EET CONTRACT IS AWARDED BY CITY BOARD

A contract for over seventy- thousand dollars and cover- the construction of concrete sets throughout the new sub- sion of Wellesley Park, known Edgewood Park, was let by the ard of trustees at their regular HRMAN eeting Monday evening. The ntract was let to M. M. Ball ose estimate was $75,373.47 The contract was a large one the trustee's room was filled th interested bidders. Seven her bids were received for the ork as follows: Kaiser Paving , $104,053; J. J. James $83,- 3.15; W. A. Daltonville, $96,- 4; Keystone Construction Co., 9,613.60; Heavy Moor Co. $87,- 6.95; and Hanrahan Co. $83,- 7.60.

Another contract was let by the ard, that of paving the streets und Mezes Plaza. Only one was received for this work, t of the Peninsula Paving Co. $5,060, and the contract was to that concern.

APPRECIATE NEWS FROM HOME

The following letter was received this week from the Lamb Sisters, daughters of Mr. and Mrs. Henry Lamb of this city, who are engaged in a successful theatrical tour of the east:

Chicago, Ill.
June 21, 1926.

Mr. J. Isaac,
Times-Gazette,
Redwood City, Calif.

Dear Mr. Isaac:

Just a word or two from a couple of Redwoodites to tell you how much we enjoy your paper every week. It surely keeps us in touch with the home folks and shows us how much Redwood is growing.

We are meeting with great success here in the east and have had an offer to go to New York in September which we will probably accept.

Our best regards to every one at home and tell them all we miss our sunny California weather.

Sincerely,
LAMB SISTERS

SUBWAY WILL CARRY HIGHWAY UNDER TRACKS

Bids were called for Monday by the California Highway Commission for the construction of a subway at South San Francisco to carry to Bay Shore Highway under the tracks of the Southern Pacific and Belt line railroads. The bids will be opened in Sacramento on July 19, it was announced by Chairman Harvey M. Toy of the California Highway Commission.

Plans for this separation which will be the largest on the state highway system, have been completed and the State Railroad commission has approved the application of the highway commission for an order to install the subway and has apportioned the cost between the State, the Southern Pacific, and the Belt line railroad.

The proposed subway will have a clear roadway width of 40 feet and in addition, a small separate passage way at one side to provide an eight foot sidewalk. The sidewalk level will be ten feet above the grade of the road.

The deck of the subway will provide space for the eight existing tracks of the Southern Pacific and Belt line railroads and provision also has been made for eight additional tracks that may be added later to provide for industrial development along the west shore of San Francisco Bay.

The grade of the highway at its lowest point, where it crosses under the railroad tracks, is nine feet below sea level at high tide. The subway, therefore, must be built thoroughly waterproof, and in this respect, is similar to the recently completed passage way on the Embarcadero at San Francisco, which is 8.88 feet below mean highwater. The Bay Shore under pass, however, will be more than twice the width of the Embarcadero subway.

To keep salt water from seeping through the subway floor and walls a massive concrete slab, heavily reinforced with steel, will extend the full length of the under pass, decreasing in thickness as the grade of the highway rises. This huge slab of concrete which constitutes the subway floor will be securely fastened to heavy retaining walls at the sides. The construction is such that the proposed subway has been likened to a huge concrete boat 800 feet long. It will be so heavy however, that, even if surrounded by water, it would not float.

The alignment of the highway approaching the subway has been made unusually fine, there being a 1,000 foot radius curve at the San Francisco end and a tangent at the south end. It is approached by slight grades at both ends.

The South San Francisco under pass is by far the largest, finest, and most expensive grade separation ever proposed on the California state highways system. It will be a fitting portal to the great Bay Shore highway.

RAVENSWOOD RESIDENTS ASK FOR LIGHTING DIST.

A petition signed by 120 residents of the Ravenswood district in the south eastern part of the county asking for the formation of a lighting dstrict in that section was received Monday by the board of supervisors. The petitioners ask that the district be known as the Ravenswood Highway Lighting District and be made to include all of the unincorporated territory known as Ravenswood The matter was laid over by the supervisors for two weeks and will be considered on July 6.

Mr. and Mrs. Stanley Rice are visiting Mrs. Rice's mother in Seattle, Washington.

Woman Escapes as Car is Struck By S. P. Train Here

Nothing short of a miracle, according to witnesses of the accident, could have save the life of Mrs. George Richards of Birch street, when her car was demolished by a train at the Broadway crossing last Saturday afternoon. Only the fact that she swerved her car to one side and so received the shock on one side saved Mrs. Richards from being crushed beneath the wheels of the train. As it was the car was completely wrecked and Mrs. Richards was removed unconscious from the wreckage.

A north bound train had passed and Mrs. Richards drove onto the tracks immediately in front of a south bound train, apparently unconscious of the flagman was waving his flag violently, and who risked his own life in an endeavor to attrack her attention.

Mrs. Richards was taken to the Redwood City hospital for treatment. Her injuries were very slight.

WORK STARTED ON NEW SUB-STATION

The Pacific Gas & Electric Co. this week began the erection on their new $125,000 sub station on the marsh, east of here. The building will be located near the city water works on a tract of ten acres of marsh land recently purchased by the electric company. Excavations for the foundation are being made and machinery is now on the ground for the construction.

The new sub station will take the place of the one now in operation on Marshall street, but will be of a much larger capacity in order to supply the increased demand for current in this section. The completion of the new station will result in the removal from the residence and business sections of the town the high voltage lines which now traverse it. The large electric tower near the corner of Main and Broadway will also be removed.

ooo

SAN CARLOS EXCANGE NEARING COMPLETION

The new $9,000 building, being erected by the Pacific Telephone and Telegraph Company on the north side of Laurel street, west of Holly street, in San Carlos, is now rapidly approaching completion.

The building will house the new telephone exchange, which will serve San Carlos and Belmont and preparations are now being made to begin installation of the necessary equipment, which will cost $66,000.

According to the telephone company, the building and exchange were necessitated by the rapid expansion of these two communities and the building has been so designed that additions can be made in the rear when future expansion of these two communities, and the building has been so designed that additions can be made in the rear when future expansion makes additional facilities necessary.

The front portion of the building will be devoted to the business office, and the exchange apparatus will be located in the rear.

SAN MATEO-BURLINGAME TEAM DEFEATS LOCAL KIWANIANS AT BASEBALL

The baseballers of the Burlingame-San Mateo Kiwanis Club played a winning game on the field of the San Mateo city park Wednesday evening against a team from the local Kiwanis Club. The final score after a five-inning game stood 7 to 6 in favor of the big leagurers from the twin cities.

The challenge to the local club was brought last week by several members of the Burlingame-San Mateo club, and was promptly accepted by the Redwood City Kiwanians.

Following the game the Burlingame-San Mateo club acted as host to its defeated visitors and spread a picnic lunch in a grove of trees in the park which had been strung with colored lights and large spot lights. Noah's famous baked ham formed the piece de resistance and was augmented by milk and butter donated by the Dairy Delivery Co. and many other tasty morsels. After the lunch the Kiwanians of both clubs and their wives and families joined in singing many well-known songs. The affair was a most pleasant one, and similar events will probably be planned for the future.

Charges Against Serveau Dropt

Charges which have been pending against Emiel Serveau, well-known resident of this city since his home on Eaton avenue was forcibly entered and searched by two federal officers some months ago, were dropped this week when the case went to trial in the court of Judge A. S. St. Sure in San Francisco.

The case was given wide publicity at the time as it was made the excuse of a violent attack upon District Attorney Franklin Swart, a neighbor and friend of the accused.

The Serveau home was entered uncermoneously by the two detectives, who in a rough manner searched through the house for evidences of liquor. A small quantity which Serveau had for his own use was found. The detectives found a number of crocks in his basement, which the family used for preserving eggs. These they broke.

When District Attorney Swart heard of the affair he wrote to United States District Attorney Hatfield, stating that he was well acquainted with Serveau, and that he knew that he was neither making liquor for sale or selling liquor as the detectives had charged. This letter was published by Hatfield and was made the center of an attack upon the district attorney by certain political interests who by twisting the statements contained therein sought to create the impression that the district attorney was defending a bootlegger.

The action of Judge St. Sure has coroberated the statements of the district attorney. No evidence was adduced to show that Serveau was in any way guilty of the offences with which he was charged. He has been a resident of this section for many years and is a highly respected gentleman. The manner in which his home was forcibly entered and searched caused considerable indignation in the community at the time.

P.G.&E. CO. IS HOST TO MEN OF THE FOURTH ESTATE ON TRIP

Last Saturday the newspaper men of central and northern California were the guests of the Pacific Gas and Electric Company on a visit to the various properties of the company located about the San Francisco Bay. The trip was one of interest and pleasure, and revealed to many the magnitude of this public service corporation.

After showing the delegation the company's building at San Jose, Newark was then visited, where is located one of the two most important transmission substations on the company's system. The bus structure is believed to be one of the largest in the world. Electricity is received from Pit river, the south Yuba development and other plants and delivered to the Santa Clara valley, the peninsula and San Francisco.

From Newark the party was taken to the Claremont substation located in the Piedmont hills back of Oakland. Here the electric energy is stepped down from 100,000 volts to 11,000 volts by means of transformers for delivery to several distribution substations in Oakland, Piedmont and Berkeley.

It was here at Claremont station which is picturesquely located in the hills overlooking Lake Temescal that luncheon was served under the huge oak trees to some 250 newspaper men, a few of whom as soon their hunger was appeased, waxed poetic as they surveyed the beautiful surroundings, amid the 'sylvan' shade of the oaks, nestled close by a pretty lake overlooking the Golden Gate.

Speeches were made by the var-

CITY BRIEFS

Lyman M. King, a candidate for lieutenant-governor, was here during the week making a canvass of the voters. Mr. King is an affable gentleman who made many friends during his brief stay. He was raised in Napa and is now engaged in the newspaper business at Redlands. In his youth at Napa he was a pupil of Senator Samuel M. Shortridge. When the senator was chosen a member of the upper house of Congress he appointed Mr. King's son a cadet at Annapolis. The young man will shortly graduate with full honors from that institution.

Mrs. A. H. Baldwin after spending a pleasant visit with Mrs. John Hall and her family on Pine street, has returned to her home in San Francisco.

Word was received yesterday stating that P. H. Donnelley of this city was slightly improved in his condition. Donnelley was stricken with paralysis while on a boat enroute to New York. He is now in New York and his wife and son, A. M. Donnelley, local realtor, are on their way to join him. The wife and son were in Chicago yesterday and will arrive in New today.

Mr. and Mrs. Frank King and their son, Frank, Jr., and his family have returned from Reno, Nevada, and are occupying their former home on Duane street.

After spending his vacation with his family at Santa Cruz, Ed Farrell has returned to his duties as deputy sheriff of this county.

Mr .and Mrs. J. L. Pipkin and daughter, Lillian, left Saturday to visit their former homes in Missouri. Mrs. Pipkin is from Kansas City and Mr. Pipkin from Springfield. They will be away four weeks.

Otis M. Carrington and family left this week for Pacific Grove, where they will spend their vacation. On wednesday evening a number of their friends gathered at their home to wish them a happy vacation. Dutch whist was played.

Thomas Johnston, a pioneer of Halfmoon Bay and a cousin of John F. Johnston of this city, is very low at his home there having suffered a paralytic stroke a few days ago. Mr. Johnston was in Redwood City only a short time ago greeting friends.

The ax collector's office was crowded on Thursday with prospective buyers of property sold for delinquent taxes. The sale was conducted by Tax Collector McSweeney, which was one of the most successful in the history of the office. The sale brought $6,000. Of the 330 parcels offered to buyers only three pieces remained unsold. The highest price received for a lot was for a lot in Vista Grande. It was number 44, Block 180. One lot was sold for eighty cents. The bidding was spirited from start to finish.

W. D. Corning, who has been confined to the Mills Memorial hospital for the past five weeks is expected home today. He will be confined to his bed for some time to come.

REDWOOD EXCHANGITES MEET WITH PALO ALTO

A joint meeting of the Redwood City and the Palo Alto Exchange clubs was held Tuedsay in Palo Alto. The affair was an open air barbeque and was held on the ground of the California Military Academy in Palo Alto. The Palo Alto club acted as host to the local organization and provided an excellent feed which was followed by swimming in the pool of the academy and by games of horse shoe tossing. Twenty-two of the local Exchangites attended the affair.

TOWN TRUSTEES TO ACT ON FIVE POINTS MERGER

The first reading was given to an ordinance providing for the annexation of the Five Points district to Redwood City Monday evening by the board of trustees of this city. The ordinance, which was drawn up by City Attorney Mansfield, will be consdireed at the next meeting of the board.

This action follows the election which was held a few weeks ago in the district which seeks to become a part of this city. At that time 57 votes were cast for annexation to Redwood City and 21 votes were cast against the move.

P.R.T Announces New Schedule Effective on June 1

The Peninsula Rapid Transit Company has under authority of the Railroad Commission, filed a new time schedule which will, according to the officers of the company, meet the demands which have been made by requests of the many patrons of the company for more expedited service between Redwood City and San Francisco. The service will be put into effect July 1, 1926.

The new service will go straight down the highway, eliminating passing through the down-town portion of the cities of Burlingame and San Mateo, as the proposed service is primarily for patrons of the company residing south of Beresford.

A further saving of time will be made by the garage facilities being installed in San Francisco to take care of the filling and inspection details, eliminating this interruption at Burlingame as heretofore.

The cars will not leave the main highway in passing through Redwood City, thereby eliminating the delays and danger occasioned by the railway crossings at Broadway and Main streets.

W. H. Pearson, president and general manager of the company, stated that although the new service would occasion heavy additional expense and operative cost, it was hoped that increased patronage would justify it, as the service proposed was a more adequate and advantageous one. That the service was particularly attractive to the people of Redwood City, involving, as it does, a saving of eighteen (18) minutes between San Francisco and Redwood City. That although the time table was on a sixty day trial that by the co-operation of the travelling public, and particularly of Redwood City, that he hoped that the service could be continued and the increased opyerative cost justified. Mr Pearson further stated that the type of equipment used in this service would be of stage type and would be distinguished from other cars by the green disc installed on the front of the car. The present low fare of fifty cents between Redwood City and San Francisco will not be increased by this service.

ooo

CHURCH WEDDING PLANNED TONIGHT

At 8:30 tonight in the Congregational church, Miss Loretta Williams will become the bride of Charles Rockwell. The ceremony will be performed by Rev. R. J. Currie of the Congregational church. The bride's sister, Miss Mable Williams will be bride's maid and Sesmore Eikerenkotter, will act as best man. Roberta Long, a little cousin of the bride will be flower girl. Special music for the occasion will be furnished by A. L. Williams of San Jose, uncle of the bride, and a talented singer.

Miss Williams is the daughter of Mr. and Mrs. H. O. Williams of this city. She is a talented young lady and has become a distinguished educator. For several years she has been a teacher in the local school department and was for some time previous a teacher in the Woodside school.

The groom is the son of Mr. and Mrs. G. Rockwell of Stambaugh street. He is also a graduate of the Sequoia High Sihool and was a member of the same class as Miss Williams. It was in high school that the romance had its inception which will result in the happy event tonight. Mr. Rockwell is connected with a large baking concern in San Francisco.

Following the wedding this evening a reception will be held at the home of the bride's parents for the relatives and immediate friends of the young people. They will make their home in a new house just completed on Fulton street.

ooo

JAMES CROWE CO. BUYS NEW AMBULANCE

A new ambulance was delivered this week to the James Crowe Co. The new machine is especially designed Cadillac and is of the most up to date design for ambulance work. The new car is ready for day or night service and will be used for carrying the sick or injured to any place required. It is the plan of the management to give ambulance service at the same rates as the aSn Francisco ambulances. Special rates will be charged within the city, however, for the convenience of the people of this city.

LARGE MAGNESIA MILL BEGINS OPERATIONS

After being closed down for five months to the day, the Plant Rubber and Asbestos Company's plant on the marsh near here, began operations on Wednesday. The plant was shut down five months ago, after one of the most destructive fires which has even been seen in this vicinity. The entire plant was destroyed with the exception of the milling department, which being detached from the rest of the plant, was not burned. A great loss was suffered from the destruction by water of a large quantity of the manufactured product which was stored ready for shipment.

The new mill has been built in a much better manner than the one destroyed, being tire proof throughout of a corrogated iron construction, and is fifty per cent larger than the one destroyed. The output of the new mill it is estimated will be half as large again as that of the previous one and there will be half again as many men employed in the manufacture.

The new part of the plant represents an expenditure of about $150,000. The original plant was built as an experiment in 1917 and was known as the Merle Magnesia Works. It was later purchased by the Plant Rubber and Asbestos Co. and has been doing an extensive business in the manufacture of magnesia products. The output of the plant consists mainly in insulating covering for steam pipes and boilers. The raw material for the manufacture is obtained from the water which is left in the tanks after salt has been extracted from sea water. Water from the nearby salt refinery is obtained for this purpose. Asbestos fibre is imported from Africa and is used to add strength to the product, Redwood has two plants manufacturing magnesia insulating material, the other being the National Magnesia Manufacturing Co.

ooo

FIRE IN HEDGE THREATENS HOUSE

When a grass fire which swept an adjoining lot ignited the cypress hedge at the Wellesley Park home of Mrs. J. W. Lowe Saturday evening it created a fire which for some time threatened the house and outbuildings. The fire department was called and for two hours fought the fire which soon spread to the other trees and bushes along the creek. Sparks ignited the roof and for a while it was feared that the house would not be saved. The efforts of the department were successful, however, and the flames were extinguished.

The department received the thanks and praise of the owner for the manner in which they fought the fire without destroying the other property. Very little damage was done by the firemen although they had to fight the fire from the beautiful gardens of the place.

ooo

SUIT FILED IN AUTO COLLISION

Suit for $10,226 was filed against Walter Dangnall Wednesday in the Superior court at Redwood City by O. H. Taylor. The plaintiff alleges he was run down and injured by an automobile driven by Dangall near Lomita Park, March 30.

CANNING SEASON STARTS PRATT LOW CANNERY

The Pratt-Low Preserving Co.'s plant on Heller street of this city opened this week for the summer season and began work on the apricot crop. At present 2000 boxes of apricots are being hauled in daily, chiefly from Los Altos and are being preserved and canned. The cannery will continue in operation through the apricot, peach and pear seasons, or until late in September.

Since the close of the canning season last year the local plant has been considerably enlarged. An entire new section has been added to the canning department at a cost of about $40,000. This and other alterations in the plant have made possible an increase of 50 percent in the output of the plant, and have made possible the employment of 150 more employees.

The plant is now employing 750 persons beside the office force. Of these 600 are women and 1g0 are men. The weekly pay roll of the local plant amounts to $15,000, most of which goes to local people and to the merchants of this city. For this reason the cannery is an important factor in the community. It is also one of the heaviest consumers of water in this city, its daily consumption being about 100,000 gallons. It also is one of the largest users of electricity in the city, and with the exception of the cement works, in this section.

Many new pieces of machinery have been added to the cannery equipment this year, and a new lighting system has been installed which gives practically a daylight effect throughout the whole cannery. Additional land has been secured and the grounds have been improved by the addition of a small park for the convenience of the employees.

The equipment of the Pratt-Low Company's Redwood City branch is one of the most complete of any on the coast. From start to finish every process is carried on mechanically with a minimum of handling. Large and expensive machines with seemingly human intelligence and more than human endurance are busy from daylight to dark filling cans, adding syrup, cooking the fruit and sealing the cans.

The product is directly supervised from start to finish, and is constantly under under the care of trained operators, who grade and sort the fruit into six different classes according to ripnass and quality. Fruit from the local cannery has made a world-wide reputation and hundreds of cases were shipped from here last year to supply the demand in England and Europe.

No detail is overlooked by the manager of the local plant, Joe Gibson, which will increase the safety and comfort of the employees. As an emergency hospital with a trained nurse is maintained at the plant, and to increase the protection against fire, Gibson has had installed a master fire alarm box with stations throughout the building.

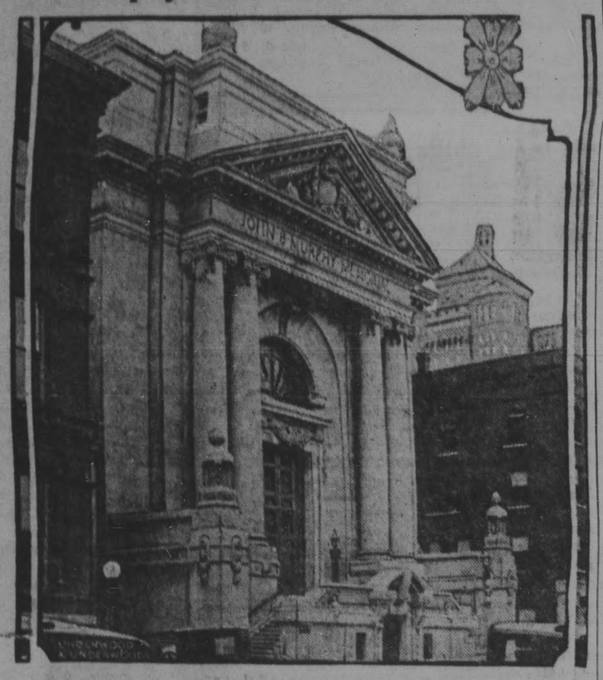
New Locomotive Welcomed in a Novel Manner

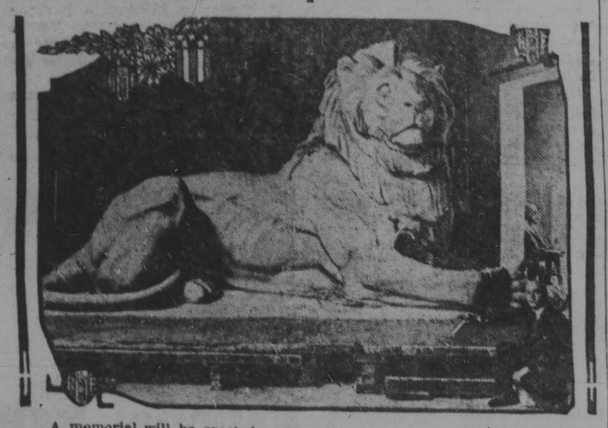
Fair employees of the Southern Pacific railroad garbed in the costumes worn during the gold rush of 1849, celebrating the construction of a new type of locomotive for use in the mountains.

Murphy Memorial Is Dedicated



Formal dedication of the John R. Murphy Memorial building in Chicago, which, architecturally, has been declared to be one of the most beautiful monumental buildings in the world, was held recently. The building was erected to the memory of one of the most famous surgeons of the time.

Lion for the Ypres Memorial



A memorial will be erected at Ypres, France, in memory of the British soldiers who fell in the salient during the World war. It will consist of an arch and this huge lion, to form the Menin gates, which will probably be unveiled in the autumn by King Albert of the Belgians. The lion, which is 18 feet in length, is the work of Reid Dick, shown at the right.

FROM THE FOUR QUARTERS

Most insects can see only a few inches.

The number of women lawyers and judges has trebled during the past ten years.

A machine gun firing 500 quarter-pound shots a minute has been perfected.

Mrs. John Butzer of Oshkosh, Wis., recently gave birth to her fourth set of twins.

A car traveling 30 miles an hour goes 22 feet in half a second.

A Chicago building of brick weighing 8,000 tons was recently moved 85 feet.

The average farm housewife wipes three acres of dishes in the course of a year.

The Salvation Army settlement in New York receives 1,200 pieces of clothing a week to dispose of.

FINE OSTENSORIUM

This is the hand-carved, silver ostensorium which will carry the sacred host as it is borne in solemn procession around the lake at Mundelein, Ill., in the closing service of the Chicago Eucharistic congress June 24. It stands three feet high, the base being emblazoned with Cardinal Mundelein's coat of arms, flanked by the figures of St. John the Evangelist and the Jewish high priest, Melchizedek.

ADLY PASHA

Adly Pasha, member of the Liberal party and friendly to Great Britain, was selected to be premier of Egypt instead of Zaghoul Pasha who was victorious in the elections but is distasteful to the English government.

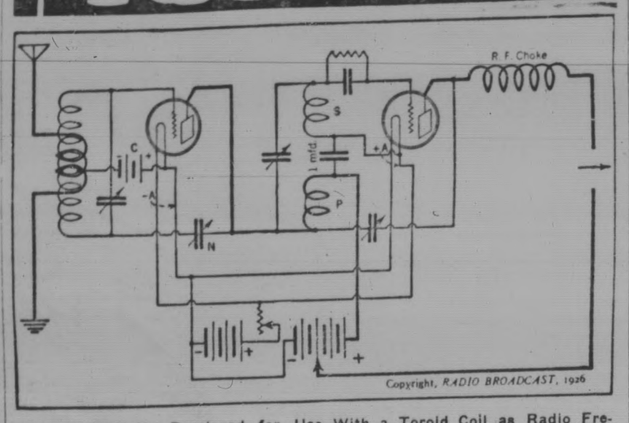
In Close Alliance

Quoth Thomas Paine in his "Age of Reason": "The sublime and the ridiculous are often so nearly related that it is difficult to class them separately. One step above the sublime makes the ridiculous, and one step above the ridiculous makes the sublime again."

The Real Artist

All things considered, the most successful interior decorator is a good cook.

RADIO



Circuit Specially Developed for Use With a Toroid Coil as Radio Frequency Coupling Device.

We have seen and heard a great deal about the toroid coil during the last few months, and much space has been devoted to the publication of data for the inclusion of these coils in already existing circuits. Few writers have gone to the trouble of describing circuits which have been especially designed to make use of the toroid inductance, however. The Radio Broadcast Magazine's "Lab." circuit is one of the few examples where special attention has been paid to this matter. A series of articles on the "Lab." circuit appears in the Radio Broadcast Magazine, from the pen of Keith Henney, the director of the laboratory of that publication.

"The great advantage of the toroid coil," he says, "lies in its restricted field. This means that energy from the coil is not likely to expand about the coil itself and interlink with other fields, and by the same token it is difficult to get energy into the coil. For this reason a circuit in the neighborhood of powerful broadcasters is not so likely to be disturbed by local signals except those arriving at the receiver through the proper means—the antenna. The fact that the field is restricted indicates that the coils may be placed closer to metal end plates of condensers, closer to wires carrying radio frequency currents of wrong phases, and even closer to each other without the many troubles incident to interstage coupling.

The Advantages.

"The use of toroids makes possible the conservation of space, the maintenance of the resistance of circuits at their lowest point, the reduction of 'pickup' from external sources, the prevention of interstage coupling by stray electromagnetic fields, and naturally makes neutralization of high-gain amplifiers a much simpler problem. All of these things are possible, of course, provided that proper precautions are taken, and provided that the experimenter does not play with an inherently unstable or unbalanced circuit."

In the circuit diagram which is reproduced here the toroid coil is employed as an interstage coupling device, and is shown as P and S. The ordinary primary of the toroid is left disconnected, the P and S as marked on the diagram consist of the secondary winding of the toroid divided. "Determining the proper place to tap the coil is a question of utmost importance, and the correct ratio of the P and S windings is found by the following formula," writes Mr. Henney:

$$N = \text{Sq. Root of } \frac{55{,}000}{Rp}$$

In the formula N is the turn ratio, while Rp is the plate impedance. The plate impedances of various tubes, with 90 volts on the plate and a negative 4.5-volt bias on the grid, are as follows:

Type Tube	Impedance	Turn Ratio
12	18,000	1.75
199	22,400	1.57
201-A	13,000	2.00
112	6,000	3.00
High-mu	30,000	1.35

(90 volts B, 1 volt C)

Not a Difficult Operation.

Neutralization in the Radio Broadcast "Lab." circuit is accomplished by the Rice method, and this is not a difficult operation if due care is exercised. It is best for the fan who intends seriously experimenting with the "Lab." circuit to start with a type 199 tube, for this latter will be found easier to neutralize than the 201-A type. Those fans who have tried a 201-A in the Browning-Drake will readily agree on this point.

By reference to the circuit diagram it will be noted that the secondary coil of the antenna tuning circuit has a center tap. It is important that the tap be taken more or less exactly at the center turn, otherwise trouble will be encountered in the neutralization process.

The size of the various tuning condensers employed depends on the coils used. The standard coils usually take a 0.0005-mfd. tuning condenser. The condenser connected across the primary and secondary of the toroid coil has a maximum capacity of 0.00025 mfd. The one connected from the plate of the detector tube to the primary of the toroid coil is the regeneration control condenser, for the capacity feedback system is employed. It is a 15-plate midget condenser. The ordinary three-plate neutralizing condenser will be found satisfactory for N. Any satisfactory tuner may be employed in the antenna circuit. A Samson choke coil was found satisfactory in the plate circuit of the detector tube, but this may be wound at home if necessary. The output, which may be connected to any good audio amplifier, is indicated by an arrow on the diagram.

"C" Battery One of Most Valuable Accessories

The "C" battery is very often disregarded in wiring up radio receivers. Whenever this is done one of the most important parts of the entire receiver is omitted. Its true worth in the circuit is not generally appreciated, but the fact is that the "C" battery pays a greater dividend in money saved and satisfaction given than any other accessory or part of the receiving system. It increases the operating life of the "B" battery, it increases the amplification of each tube in the circuit, it makes possible the use of higher plate voltage, it increases the load-carrying capacity of the tubes, it greatly reduces distortion from overloading, and it improves the quality of the output of the receiver. And all these things the little "C" battery accomplishes without itself furnishing any appreciable current, so that all are practically obtained without cost.

From an economical point of view the greatest gain derived through the use of a "C" battery is in the increased life of the "B" battery. For the higher values of plate voltage and with the proper adjustment of the "C" battery voltage, the useful life of the "B" battery is practically doubled. Even with the increased life of the latter a little "C" battery will outlive several sets of "B" batteries. But suppose that it will outlive only two sets of them. Then during the life of the "C" battery two sets of "B" batteries will have been saved. The cost of these saved "B" batteries might have been $12, whereas the cost of the "C" battery which effected this saving might have been only 75 cents, a saving of $11.25. Hence, from this point of view alone it is decidedly worth while to include the "C" battery in the receiver.

But this is not the only advantage. The greater amplification per tube will make the set more sensitive and will bring in more stations, and the increase in the load-carrying capacity of the tubes will give more volume without introducing noticeable distortion. The latter gain results in greatly improved quality of the output, and this is one of the most important advantages of using a "C" battery. Without the "C" battery the tubes will overload quickly and result in harsh quality in the loud speaker; with a correctly adjusted "C" battery and a sufficiently high plate voltage loud speaker volume of pure quality may be obtained.—New York Herald-Tribune.

Nickel-in-Slot Radio Among New Inventions

After sixteen months' work Joseph Pinto has completed a unique radio slot machine. When you drop a nickel in, the machine is set in operation so that you can tune in on any desired broadcasting station for a limited time. A red warning light flashes one minute before the time is up. The receiver, says Popular Science Monthly, operates equally well on batteries or house current.

Batteries and Tubes Are Cause of Much Trouble

Radio repair experts find that approximately 85 per cent of the faulty sets they are called to inspect fail to work because of an incorrect battery hookup or because of an imperfect tube.

Although the battery hookup is plainly marked both on the set and batteries, thousands of radio owners find it difficult to make right connections. This is chiefly due to a prevalent idea that a plus and minus must be connected together wherever possible. People have heard that it takes a plus and minus to complete an electrical circuit. However, this idea becomes hazy and obscure. Radio set owners get the most startling results due to novel and original hookups based on the plus and minus idea.

The second important trouble-makers in your set are the tubes. Tube trouble can usually be distinguished by a peculiar howling noise in the set. This is different from the squeaks and squealing usually caused by run-down or wrongly connected batteries.

If all the tubes in your set are old, you may try rejuvenation by disconnecting the "B" batteries, turning on the "A" batteries and starting your set in operation. Some radio experts advise disconnecting the "B" batteries, exchanging the connections on the "A" battery so that the negative wire goes to the plus terminal and the plus wire goes to the negative terminal. However, tube rejuvenation has as yet not proved satisfactory to a valuable extent.

If you want to find the tube in your set that is howling, get an extra tube to perform the test. Open your set and take out the first tube. Replace it with the new tube. If the howling continues take out the extra tube and put the first tube back in place.

Continue this operation with every tube in the set until you locate the howler. The howling tube should be marked or destroyed so that it will not find its way into the set again.

Often a vernier attachment on the detector rheostat will add distance and clarity to the reception of a regenerative set.

Good Printing
THE kind of printing that pays dividends is the kind you should have. Pale, muddy, poorly arranged printed matter is worse than none. The quality of your business is often judged by the quality of your stationery — inferior printing gives an impression of cheapness that is hard to overcome, while good printing carries with it a desirable suggestion of quality.
We produce only Quality Printing. Whether you want an inexpensive handbill or a letterhead in colors, if you order it from us you will be sure of getting good work. We have the equipment and the "know how" that enables us to get out really good printing—printing that will present people with the good taste of its users. That is the only kind of printing that

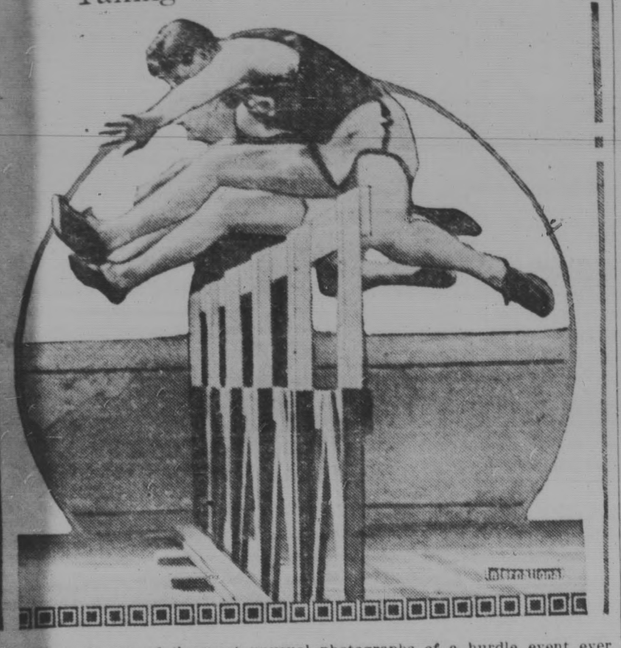
Taking the Hurdles on High



Above is one of the most unusual photographs of a hurdle event ever made. It shows the contestants in the freshman 120-yard hurdle race at the Yale-Harvard dual track meet, taking the hurdles as a team. From this angle the spectator sees only one full figure, with a mass of arms and legs in flight.

Star Joins Giants

Above is pictured Andy Cohen, the Texas baseball star, who has just joined the New York Giants. McGraw expects this youngster to fill in at short while Travis Jackson is laid up. A combination of Lindstrom, Cohen, Frisch and Kelly present a real international angle.

Sport Notes

Indiana has 85 high-school football teams.

* * *

The ice-skating record for 100 yards is one second faster than the running record.

* * *

Charles Paddock is said to stride from 7 feet 6 inches to 8 feet in his sprint races.

* * *

Billy Bridwell, fifteen-year-old schoolboy, is the Arkansas state amateur golf champion.

* * *

Jack Dempsey will get $450,000 for his next fight. It represents, maybe, what it really will be worth and interest.

* * *

Rome and Milan, as well as cities in Austria, are holding light harness races. The trotters and pacers have been fast.

* * *

A visitor to Havre de Grace decided to invest in a ticket on a horse that tried to bite him and won $27 on a $2 ticket as a result.

* * *

Quite probably the first improvement installed by Red Grange in the Wheaton mansion bought with his football money was an iceless ice box.

* * *

The Union Boat club of Boston was the first American club crew to win a race in the Henley regatta in England. The club is seventy-five years old.

* * *

Henry F. Schulte, developer of Roland Locke, sensational sprinter, has signed for five years more as head track and cross-country coach at Nebraska.

* * *

Henry B. Bjorkman, who captained both the 1925 Dartmouth football and baseball teams, has accepted a coaching job at Georgia Tech, beginning September 1.

* * *

H. R. (Tack) Hardwick, former Harvard football player, has confirmed the report that he has purchased the Portland Rosebuds hockey team to represent Chicago in the National hockey league.

* * *

In tennis circles it is generally reckoned unlucky for a player to wear green, and even a racket strung with green gut or with green binding on the frame is looked at askance by many players.

* * *

Trustees of Northwestern college appointed Gordon R. Fisher athletic director to succeed W. S. Collins. Fisher is from the University of Minnesota, where he was a letter man in football and track.

* * *

John C. Miles, Cape Breton youth who won the Boston marathon race, says his father is the "best trainer in the world." His father was also a long-distance runner.

* * *

University of California will use steel seating frames to increase the seating capacity of the Memorial stadium to 82,000.

* * *

Miss Eva Morrison of Nova Scotia has been practicing swimming in Boston harbor preparatory to trying the English channel test.

BASEBALL NOTES

Babe Ruth, the Yankees' slugging outfielder, swings a 44-ounce bat.

* * *

Baltimore again looks to be the class of the International league.

* * *

Milwaukee is giving Pitcher Griggin from the Michigan-Ontario league a trial.

* * *

Nowadays Mr. Ruth may be briefly described as just an outfielder and retired author.

* * *

Grover Alexander, veteran Chicago pitcher, and his wife both celebrate birthdays on the same day.

* * *

Dale Gear, president of the Western league, also handles the affairs of the Southwestern league.

* * *

The University of Illinois baseball squad includes O'Keefe, O'Grady, O'Shaughnessy and Finnegan.

* * *

Baltimore has taken on Pitcher Slappey, a southpaw, who was formerly in the Southern league.

* * *

Ralph Michaels, infielder, was released outright to the Kansas City American association club by the Chicago Cubs.

* * *

Bob Fothergill, Detroit outfielder, is the fastest fast man in the major league. He is also one of the most aggressive.

* * *

Twenty-five players in the major leagues are about thirty-five years of age. Babe Adams of the Pittsburgh team is forty-three.

* * *

Bryan Harriss of the Philadelphia Athletics is the tallest man on the major league diamond, towering 6 feet 6 inches from his cleated boots.

* * *

The average player in the 16 major league baseball clubs is an athlete twenty-eight years of age, five feet eleven inches tall, and weighs 172 pounds.

* * *

Louisville won the opening day attendance cup hung up by President Hickey of the American association with 14,420 paid admissions. Toledo drew 12,317.

* * *

The baseball manager leads a troublesome life, and so does the director of an opera troupe, but it might be worse. Think of managing a southpaw opera star!

* * *

When Walter Johnson pitched Washington to victory over St. Louis on May 12, it marked the four hundredth win of his big league career now in its twentieth year.

* * *

Walter Miller, now with the Pirates, who pitched for the Grand Rapids (Minn.) baseball team four years ago, is rapidly making his way to the top in big league baseball.

* * *

Herb Pennock celebrated opening day at Philadelphia, April 14, 1915, by holding every Boston batter but Hooper hitless and winning 2 to 0. The Athletics earned both runs off Shore.

* * *

Dutch Schessler, right-handed pitcher, is back with the Harrisburg team of the New York-Pennsylvania league, after having been traded to Shamokin. He failed to come to terms with the latter club.

* * *

Joe Tinker, famous shortstop of the old Cubs' machine, is carrying around packages of clippings telling of the great playing of Joe, Jr., who is holding down second base for the Orlando Florida State league club.

* * *

Some men listed as pitchers had very little to do. The St. Louis Browns carried Chester Falls all season, and he pitched in only 25 innings. Manager Sisler also hung on to Stauffer and used him in but 30 innings.

* * *

After having announced that Pitcher Harry Lee had been returned to the Omaha club of the Western league, the Seattle club changed its decision and will keep the flinger. It is said Lee refused to report back to Omaha.

* * *

Rhoderich (Bobbie) Wallace, great shortstop for years and now coach of the Cincinnati Reds, is receiving congratulations on the announcement of his engagement to Barbara Genins, widow of the late Frank Genins of St. Louis.

BASE LINE COACH CALLS IT SCIENCE

Aims to Make Every Word Suit the Occasion.

Probably one of the most-abused members of the Philadelphia club is Benny ("Megaphone") Meyers, baseline coach. Meyers' resonant tone qualities have echoed through major and minor league baseball for the last 20 years, for Benny has always coached, even in his early professional and still earlier amateur days as a player. He is one of the few who regard their vacation in the light of an art, not so much depending on the skill of directing traffic on the bases as the aptitude of remarks to meet changing situations.

"You may not believe it," says Meyers, "but many a ball game hinges on the psychology of a coacher's remark. In a tight game, for example, the ninth inning, with the score tied, one out and a man on second, I may address my batter and say, 'A hit will win this ball game.' I say it good and loud (I never whisper, anyhow), so's the opposing pitcher can hear it.

"What's the effect of that remark? Why right away Mr. Pitcher is reminded of his responsibility. He turns the situation over in his mind and says to himself, 'Gee, this looks bad.' Naturally he isn't at his best and the chances of the run being scored are just so much improved for our team."

The volume of Meyers' voice and its irritating qualities have a definite market value. He once was purchased from Newark by Jim McCaffrey, then owner of the Toronto International League club, just to keep him "from tantalizing the Toronto club any more," as McCaffrey explained.

"If they stopped the coaches from saying anything," said Meyers recently, with a certain touch of wistfulness in his voice, "I might as well fold my tent and be on my way. I wouldn't be any good to my ball club. A coach that doesn't say anything or that just makes noise at random is a total loss. I aim to make my remarks fit the occasion."

If Nevers Succeeds He Will Kill Off Old Jinx

Major leaguers are wondering what success Ernie Nevers will have as pitcher for the St. Louis Browns. Nevers was a big star in baseball as well as on the gridiron.

That means something when you take into consideration that his coach, Glenn Warner, who also developed Jim Thorpe, pronounces Nevers the greatest football player of all time.

If Nevers makes good in big league circles he will kill off a jinx that has followed football-baseball stars for years. Mighty few of them have delivered in the majors.

As a matter of fact, college players, even those who didn't dabble in football, had a tough season of it in the American league in 1925.

Not one, with the possible exception of Pitcher Carroll, the Holy Cross star, got very far and he just about reached first base.

Even Carroll, who had won 48 out of 50 games as a college pitcher, found the going much different in the majors.

For several years college stars have not been such howling successes in the majors. In addition they have come mighty high, for most of them are good business men.

Harry Hampton's Putts Were Very Badly Played

Speaking of missed short putts, as many golfers have been doing since the Bob Cruickshank incident in the Texas open, there is the failure of Harry Hampton in the Canadian open at Toronto three years ago.

Playing the ninth hole of the Lambton club, a hole of some 200 yards or more, Hampton was going well when he suddenly ran into trouble. His tee shot caught a trap. He finally made the green with his third shot and then took three putts. The third putt hung right on the lip of the cup. A single half turn and it would have been down. In disgust Hampton walked over to the ball, jabbed at it with his putter and completely missed the ball.

Sets World's Record

On May 4, Johnny Reider of the Springfield (Mo.) team hit three home runs in three official times at bat in a game at Okmulgee, Okla. The following day he got two homers and two triples in five times at bat at Ardmore, Okla. Then in the next game, played May 6, Reider got three more home runs in four times up, setting a world's record.

Career of Jimmy Ring

Jimmy Ring, the Philly hurler, obtained by the Giants in the Bentley-Dean trade during the winter, has been in the big show continuously since 1919. That year he was with Cincinnati, taking part in the world series against the White Sox. He won one game and lost one. Ring remained with the Reds through 1920, when he was traded to the Phillies in the Rixey transaction. His best year with the Quakertown tribe was in 1923, when he won 18 and lost 16.

"SCISSORS" PAINTED LAMPS; MUCH IS MADE OF LACE

THERE'S no place like home, and every day in every way American homes are getting better and better. The most unpretentious of modern homes and the smallest of flats are built for comfort and convenience, with attention to interiors that will make satisfactory backgrounds for tasteful furnishings.

About the most important of small furnishings are lamps and lamp shades, and now come the new "scissors" painted lamps and crystalline lamp shades, handsome enough for millionaires' homes and inexpensive enough for anyone. They may be bought ready-made, but hundreds of women, who could not otherwise afford them, are making them at home. Such a lamp and shade are pictured here.

PRETTY HOMEMADE LAMP

To make the lamp use an unglazed pottery vase, or a glazed surface may be used by first painting it over with a mixture of denatured alcohol and transparent amber sealing wax, of the consistency of thin sirup. When this is dry a printed design is cut out from crepe paper and pasted to the case. Use a mixture of paste and glue and brush on the back of the design with the grain of the paper, being sure that the edges are well pasted. Put in position and press down very carefully. Now paint the entire surface again with the mixture of alcohol and sealing wax, and, when dry, paint in the background in any desired color, using sealing wax and alcohol mixed to the consistency of cream. A second coat of the transparent paint may be applied as a finish.

To make the shade, a wire frame is first wound with white taffeta seam binding, sewing or pasting down the ends. Handkerchief linen cut on the bias is then stretched smoothly over the frame and first pinned and then sewed to place. Paint the entire surface with the transparent sealing wax, paint and allow to dry for one hour. Meanwhile cut out the design wanted from crepe paper, and when the shade is dry pin to the shade, in small sections, sticking the pins straight through the linen. When satisfactorily arranged remove one piece at a time, apply paste and put it back on the shade, pressing to the foundation with soft paper. When completed paint the entire surface again with the transparent paint and put in the background, as described for the lamp. After this is dry the final coat of transparent paint and crystalline are added. For this the transparent paint is thickened a little and applied to a section of the shade. While it is wet the crystalline is sprinkled on it, using a salt shaker with large holes. When the shade is entirely covered it must not be touched until it has dried for at least twelve hours. The edges are then finished with braid or other trimming, pasted to place.

Midsummer has stepped over the horizon of fashion and is bringing with it the last adaptation of spring styles to summer needs. The survival of the fittest is evidenced in quite a wide variety of styling, which includes all the features best suited to sheer frocks, such as capes, jabots, godets, full skirts and short or draped sleeves. Georgette and chiffon frocks are diversified by many different lace treatments and the use of lace is lavish in dresses for formal occasions, culminating in dresses made entirely of lace, posed over a foundation slip.

Just now black and pink make a fashionable color combination which is used in day or evening frocks, and is very popular for dinner and dance dresses. Lace makes a dignified appeal and the black lace dress over a color is in high favor for dresses of mature styling, like the model shown here. This is made of black lace in a chantilly pattern and posed over a pale pink slip. Ecru lace provides the graceful girdle and large medallions let into the full skirt. The short lace cape, falling at the back, is a chic and dashing accessory.

The long-waisted bodice, set on to a full skirt by means of a crushed girdle, is an accepted style that makes easy sailing for the dressmaker who is undertaking an all lace frock.

Lace lends its dignity and fine appeal to many pretty frocks made of georgette or chiffon. Deep cream colored ecru laces are used, in godets or narrow, triangular panels, set into circular or plaited skirts or in deep lace borders and circular flouncings. These and set-in medallions, are combined with all the light colors and with black, but the favorite combinations are those that have little color contrast or none, as in many lovely frocks of warm tan georgette made up into lace to match, or pale gold georgette with cream lace.

JULIA BOTTOMLEY.

(©, 1926, Western Newspaper Union.)

DRESSY SUMMER FROCK

New Sport Dresses

The latest sport dresses, made from imported French materials, are on the square and the squares are on the dresses. These woolen fabrics are decorated with large shaded squares. The graduation is made by the loosening or tightening of some of the colorings of the yarns in weaving.

Polka Dots and Butterflies

The designs exerting most influence at present on the crepes and mousselines for summer are the polka dots and the butterflies. The latest polka-dot design has the dots in graduated sizes with a secondary dot of the contrasting color in the middle of each. The butterfly designs lend themselves admirably to the printed mousselines and crepes.

Plain Backgrounds

Plaid chiffon and plaid taffetas are very smart this year, particularly for afternoon frocks. Usually the combination is high color on a dark, conservative ground.

THE KITCHEN CABINET

(©, 1926, Western Newspaper Union.)

Mid the rich stores of nature's gifts to man
Each has his loves, close wedded to his soul
By association's golden links.
—Eliot.

EVERYDAY GOOD THINGS

There is nothing that takes the place of a good salad for a luncheon, dinner or supper dish.

Garden Delight.—Take one each of fresh, green and red pepper, chop fine and mix with one cupful of cottage cheese which has been well seasoned and enriched with butter or cream. Line salad plates with lettuce, and lay on each one-half of a banana cut lengthwise, add salad dressing to the cheese and cover each with the cheese dressing.

Halibut Souffle.—Take one cupful of halibut flaked, one cupful of thick white sauce, one egg beaten stiff, one tablespoonful of lemon juice, one teaspoonful of worcestershire sauce, salt and pepper to taste, one cupful of bread crumbs and two tablespoonfuls of grated cheese. Mix the flaked fish with the white sauce, add the lemon juice, and worcestershire sauce, salt and pepper, then fold in the egg white beaten stiff. Butter a glass baking dish; fill three-quarters full, leaving room for the crumbs and cheese on top. Mix the crumbs with melted butter and the grated cheese. Sprinkle over the souffle, bake in a hot oven fifteen minutes. Serve with a spicy tomato sauce if liked.

Prune Cake.—Take one cupful of sugar, two tablespoonfuls of butter, one cupful of cooked prunes, finely chopped; one-half cupful of prune juice, one teaspoonful of soda, two cupfuls of flour, two teaspoonfuls of baking powder, one teaspoonful of cinnamon, one-half teaspoonful of cloves, one teaspoonful of nutmeg. Mix in the order given, sifting flour and dry ingredients together. Bake in two layers about thirty minutes. Ice with one cupful of powdered sugar, three tablespoonfuls of butter and enough cream to make of the consistency to spread. The butter should be well creamed with the sugar before the cream is added.

Ox Tongues and Spinach.—The canned tongue and canned spinach may be used for a hurry-up meal. Heat the tongue and place on a platter neatly sliced. Surround with a border of seasoned spinach chopped, garnished with sliced hard-cooked eggs.

Baked Ham.—For each thick slice of ham take one cupful of milk or enough to cover. Cover and bake in a slow oven for an hour or more.

Dishes From Grains.

The coarser foods are quite necessary in our diet and should be freely used at all times of the year.

Scotch Oat Crackers.—Put two cupfuls of rolled oats through the meat grinder, add one-fourth of a cupful each of milk and molasses, one and one-half tablespoonfuls of fat, one-fourth of a teaspoonful of soda, one teaspoonful of salt and one-fourth of a cupful of raisins or nuts cut into bits. Mix well, roll very thin and cut into fancy shapes. Bake twenty minutes in a moderate oven.

Oatmeal Soup.—Take one-half can of tomatoes, one-third of a cupful of oatmeal, two cupfuls of water, one tablespoonful of sugar, one-half of a small onion, pepper and salt to taste, a bit of bayleaf and two tablespoonfuls of peanut butter. Cook one hour, rub through a sieve, add seasoning if needed and serve hot.

Hominy Gems.—Pour one cupful of scalded milk over half a cupful of corn meal, add one-fourth of a cupful of hominy, a tablespoonful of sugar and the same of shortening; mix well, cool, add a yolk beaten thick and a white beaten stiff. Sift in one and one-half teaspoonfuls of baking powder and a little salt; beat well and bake in hot well-greased gem pans.

Corn Meal Gems.—Take one-half cupful of corn meal, add one cupful of flour, three teaspoonfuls of baking powder, one tablespoonful of sugar, one tablespoonful of melted butter, one-half teaspoonful of salt, three-fourths of a cupful of milk and one egg. Boil the milk, scald the corn meal, cool and add the remaining ingredients. Bake in well-greased muffin tins.

Hominy and Pecan Croquettes.—Boil one-half cupful of hominy with a teaspoonful of salt in two cupfuls of water five minutes, then put into a double boiler and cook two hours. Add two tablespoonfuls of shortening, one-half cupful of chopped pecans and a teaspoonful of scraped onion. Cool and shape into cylinders. Beat one egg lightly, add two tablespoonfuls of water, roll the croquettes in crumbs, then egg, then in crumbs again and fry in deep fat. This makes one dozen croquettes.

Rich Drop Cookies.—Cream one-half cupful of butter, add one-half cupful of sugar, one egg well beaten, three-fourths cupful of flour, one-half teaspoonful of vanilla, raisins, nuts or citron. Drop by teaspoonful on butter sheet, spread thinly with a knife dipped in water; decorate with fruit and nuts.

Nellie Maxwell

Earliest Kind of Soap

Mankind at a very early period in its history discovered the necessity of soap to remove dirt and grease. The first soap, it is said, was made of goats' tallow and the ashes of beechwood.

Old Swedish Mine

In Sweden there is a mine which is so old that records are missing as to its age. As far as can be known the mine has been in active operation for more than 800 years.

EAGER SHOPPERS THRONG STORES

Salesgirls Dread Bargain Days

Louisa was tired. From morning until night she had been on her feet in the busy department store. No matter how she felt, she must serve her customers with a smile. Her head throbbed and her feet ached. Week after week, she felt her strength ebbing until she was in a run-down condition, not fit to work.

"My mother suggested that I try Lydia E. Pinkham's Vegetable Compound," she writes. "I took only three bottles and it brought me about all right." Through the Vegetable Compound, she found better health to do her work and she told the other girls about it.

That was several years ago. Louisa is now Mrs. L. G. Van Dyke of 1246 Spring St., Morrell Park, Baltimore, Md. She is the mother of three healthy, active children. She says that she found the tonic effect of the Vegetable Compound helpful to her during this critical period.

Every working girl knows that to do her work properly and easily she must have good health. She can not afford to lose time from her work.

Girls who suffer from weakness and run down condition should try Lydia E. Pinkham's Vegetable Compound.

Ask your neighbor.

A Poet's Theme

In the hands of the true artist the theme, or "work," is but a mass of clay, of which anything (within the compass of the mass and quality of the clay) may be fashioned at will, or according to the skill of the workman. His genius, to be sure, is manifested, very distinctly, in the choice of the clay. It should be neither fine nor coarse, abstractly, but just so fine or so coarse, just so plastic or so rigid, as may best serve the purposes of the thing to be wrought, of the idea to be made out, or, more exactly, of the impression to be conveyed.—Poe.

Acid stomach, heartburn and nausea are corrected with the use of Wright's Indian Vegetable Pills. 372 Pearl St., N. Y. Adv.

Cling to Wood Market

An interesting old custom, that of the wood market, has continued for more than 100 years at Claremont, N. H., and is still in progress in the same place, near the town hall and bull park. On a Saturday noon more than a dozen loads of stove wood waited for sale. By 3 p. m. they had all disappeared.

CORNS
In one minute the pain is
Gone!
Gets at the *cause* of corns

Dr. Scholl's Zino-pads work like magic, because they remove the *cause*—pressing or rubbing of shoes. The pain goes instantly. Amateur paring or burning with "drops" (acid) is dangerous—and doesn't stop the cause. Zino-pads are safe, sure, antiseptic, healing. They *protect* while they *heal*. Get a box at your druggist's or shoe dealer's—35c.

Bedspring Saved Life

Carrying a bedspring saved the life of a New York man, sixty-four years old. He was on the way home, carrying the spring, which he had just purchased. Crossing the street in front of his home he was struck by a delivery truck. The spring broke the force of the impact, but the man was knocked down and the spring fell on top of him. The driver of the truck, unable to stop, ran over both. The victim suffered only minor bruises. After treatment by a physician from the General hospital, he picked up his spring and walked home.

It depends on what kind of a scrape you get into whether you want sympathy or not.

SATURDAY, JUNE 26, 1926.

HE STICKS TO HIS POST

WHILE the three candidates for United States Senator are going up and down the state making speeches and campaigning for votes Senator Samuel M. Shortridge is at his post at Washington working in the interest of his constituents performing meritorious service for California. He will remain at his post of duty until the last hour of the present session of Congress watching bills in which the state is directly interested. The senator in placing duty above personal gain is winning the admiration and friendship of the people of the whole coast. The voters of California commend his course. They will show their appreciation by giving him a tremendous vote on August 31.

Senator Shortridge has done a great deal for the state, in fact, no senator in the past forty years has done more for California than has Mr. Shortridge. He has been faithful, loyal and earnest in the support of every issue in which the state has been interested. Now that he has gained prestige and influence in Washington it will be to the very best interest of the people to retain him at the capital. A new man would be utterly helpless. Keep Mr. Shortridge at Washington.

MEETING the PROBLEM

AMERICA today is one of the most prosperous nations in the world. Living conditions have been improved many fold in the past century and today the man who works for his living has many advantages which a few years ago were enjoyed exclusively by the independently rich. Yet in spite of the general prosperity and high standard of living prevalent here, statistics would indicate that there are still in this country more than ten million families which from one cause or another are destitute and a charge upon the community.

In these ten million families children are raised, and it would appear that the proportion of children is greater among them than among families better able to support them. Children are raised in want and with practically no home training, a miserable environment and no chance to see anything but the worst side of society.

It is from such homes that the criminally inclined, the vicious and the moron are found to come largely, but not entirely. Brought into world handicapped, forced to a struggle with the world for which they have no way been prepared, taught that the world owes them a living, but not how to earn it honestly, they naturally turn to easier ways and are soon found as inmates our penal institutions, beaten in a battle in which they had no chance.

What then is the solution of such a problem? How can society protect itself against these conditions? To be sure we have jails, and gallows and courts and spend great sums annually for their upkeep, yet they only serve for the adult who is already in the ways of crime and who in many cases has already begotten children who are following in his footsteps to take his place in the world when he finially is put away for the protection of society.

Only by the proper education of the young can such conditions be alleviated. By compulsary education, by fortifying and improving the public school, and by making our school system a training in those things which will aid in the battle with the world.

In the public school the children of rich and poor, of American and foreigner, of all creeds and beliefs and from all stages of society meet and learn the same lessons of good citizenship. No other institution can wield such an influence against anarchy, against bigotry, against social unrest and all influences which from time to time threaten the wellbeing of the republic.

Depending for its liberty upon giving equal rights and equal duties to all, the republic can best serve its ends by giving equal chances to its future citiens. Teach them to use their rights and do their duty. This is the mission of the public school.

—o—o—o—

"What kind of girls were popular in your day, Grandpa Tubbins was celebrating his 102d birthday, and the local newspaper, in accordance with custom, had sent a man around to interview him.

"What kind of girls were popular in your day, sir?" asked the reporter.

"Same kind o'course!" snorted Grandpa in disgust.

Residence 175 Hudson St.,
Phones: 957-J and 747-W.

Episcopal Church will hold Special Service Sunday

Next Sunday, June 27th, is "Everybody at Church" Sunday at St. Peters Episcopal Church. It is hoped that all those in Redwood City, who are members of that church, will show their love and loyalty, by making a special effort to attend the eleven o'clock serice that day and bear witness to that fact.

The Reverend Pastor seids out this call to all members of the Episcopal Church, and all others who care to come: "If there are any in Redwood City who were brought into the Faith, through the ministrations of this branch of Christ's, won't you come to your Mother Church Sunday? She holds forth her outstrtched arms and beckons you to her altars, where may be had the Bread of Life. The Church has been brought down through the ages to us, because of the loyalty and love of her sons and daughters, and the grace of God the Holy Spirit. So come and do your part, that your glorious heritage, the Church, may be the guiding light for your children, and unborn millions. Come and receive the Church's blessings. "The blessings of God Almighty, the Father, the Son, and the Holy Ghost be amongst you, and remain with you always. Amen."

SAN CARLOS

Mr. and Mrs. J M. Edling and children spent the week end at Yoland, where they visited with Mr. and Mrs. J. M. Edling, Sr.

Carl and Clyde Clark motored to Fresno over the week end to visit their parents, returning to their home late Saturday evening.

Mr. and Mrs. E. Monroe and son Ralph spent Sunday at Forest Dell in the Santa Cruz mountains, where they visited Mr. and Mrs. Frank Clark who have a cabin site there.

N. A. Egilbert, local banker and family have taken possession of their new bungalow on Chestnut street, just completed by Frank Clark, local builder.

Jack Jones, son of Mr. and Mrs. H. L. Jones, who has been confined to his bed on account of illness, is able to be up and around again.

A novel entertainment will be offered by the San Carlos Parent-Teacher Association in the form of a whist cabaret party on June 26th, in the auditorium of the San Carlos grammar school. Whist will be played and the program rendered throughout the evening will be by Mrs. James H. Martin, Fred Rasmussen, Mildred Hopkins and "Maggie." Mrs. D. L. Stewart is chairman of the affair, assisted by Mrs. L. P. Hopkins and others. Dancing and refreshments will follow the card game.

Mr. and Mrs. Victor Allen of San Mateo were visitors in town on Wednesday evening.

Mrs. A. P. Dennery entertained at luncheon on Wednesday, Mrs. F. Keyser and Mrs. Edward A. Dennery, both of San Francisco.

Mrs. Mary Garwood, niece of Mrs. J. W. Davis, has left for Idaho, where she will spend her vacation as the guest of her father F. Garwood, who is in charge of a S. P. station in Idaho.

Mr. and Mrs. Willey of Burlingame entertained as her guests Mr. and Mrs. Porter Helfin of San Carlos.

A splendid reception was accorded the ladies from Redwood City and San Carlos last Sunday at the base hospital, Menlo Park, when an entertainment was given for the benefit of the patients and staff. Mrs. James Hugh Martin, Mrs. H. A. Clattenburg and Mrs. Gordon de Holmes contributed several musical numbers. The Sciots band of San Mateo also rendered some splendid selections.

Arline Stewart, daughter of Mr. and Mrs. D. L. Stewart, is spending her vacation at Los Angeles as the house guest of her aunt.

Mrs. Charles S. Decker entertained at bridge complimentary to Mrs. Waldeman, who has been the house guest of Mr. and Mrs. H. S. McCord. Guests included: Mesdames J. M. Edling, H. S. McCord, W. Devereaux, J. E. Baughn, E. F. Russ, Baberstock and Mrs. J. E. Whigham, Glen Fischer, G. E. May.

Mr. and Mrs. J. M. Edling entertained at dinner at their home Mr. and Mrs. D. P. Tinney, Mr. and Mrs. R. P. Piercy and Mr. and Mrs. T. H. Collins.

Interconnection of power systems in California proved to be an economic factor, resulting in greater distribution of power when and where needed.

Thru interconnection, California Power Companies have been able to pool their power supplies for the benefit of the entire state.

This interconnection makes possible the delivery of hydro-electric power during dry seasons into sections that would be without power or dependent on expensive steam generated power.

The business initiative and enterprise of these companies continually aids state development.

Since 1913 the average per capita cost of living increased 65%, while the average cost of electricity decreased 8%.

Cleaning Without Odor by the
F. Thomas *Process*

Our many years of experience has taught us that it is impossible to do perfect cleaning with cheap, inferior methods. That is why we found it necessary to invest nearly $500,000 in the equipment of a plant and the establishment of an expert organization to do the quality of work demanded by our customer.

With the "F. THOMAS PROCESS we do not only remove every particle of dust but we return your garments without that usual disagreeable smell of gasoline. Every drop of gasoline we use in cleaning is redistilled and very highly refined.

Raw gasoline — the kind that you buy fo you automobile — is full of heavy oils and unfit for cleaning fabrics. It is little better than ordinary distillate and leaves a sickening gasoline smel in your clothes.

GENEROSITY OF PHONE COMPANY IS SHOWN

A letter is being sent by The Pacific Telephone and Telegraph Company to all purchasers on the Pacific Coast of American Telephone and Telegraph Company stock under the partial payment plan of the Bell Telephone Securities Company, advising them that a credit of $6.21 a share has been given their accounts in lieu of the "rights" that they would have received had they been actually stockholders of record on June 8th. This means that accounts in the Pacific Coast territory totaling 5407 shares will be credited $35,937.50, and, inasmuch as the contracts specify in each case that interest shall be paid at the rate of 5 per cent on all payments but all dividends and rights shall accrue to the Securities Company until the sock is paid for in full, it is an unusual example of the generous treatment of the public under the plan of the Securities Company for the ecouragment of thrift. In other words, the Bell Telephone Securities Company, instead of using the "rights" to which it is entitled as owner of the shares which it has elready purchased for subscribers in the open market has elected to dispose of the "rights' for cash and credit the account of its partial payment subscribers with the proceeds.

The closing price of A. T. & T. "rights" on the N. Y. Stock exchange for each day of the "when-as- and if issued" market was taken, and an average of those prices was $6.21, giving the fair value to be credited to partial payment purchasers.

A purchaser of stock that has only made one payment of $10 a share receives the credit of $6.21 the same as those who have made many monthly payments.

Interest will accrue on the special credits from July 1st.

Since May 20th, 1410 individuals have made application at the business offices of the Telephone Company in Washington, Oregon, California and Nevada for 12,277 "rights." In addition, since the first of the year 5,052 individuals in this territory have purchased 25,345 shares of A. T. & T. stock under the options of the Bell Telephone Securities Co., representing an investment of approximately $3,500,000.

All of this work is carried on by the Telephone Company without a single stock salesman, and no profit is made other than the intangible profit occasioned by a wide distribution of the stock and the increase in the prosperity of each community by the individual accumulation of capital.

NOTICE OF SALE OF REAL ESTATE

In the Superior Court of the State of California, in and for the County of San Mateo.
No. 3643

In the Matter of the Estate of MARY HOOKER SMITH, also known as MARY H. SMITH, Deceased.

Notice is hereby given that the undersigned, executor of the last will and testament of Mary Hooker Smith, also known as Mary H. Smith, deceased, will, on or after the 30th day of June, 1926, sell at private sale, to the highest and best bidder, upon the terms and conditions hereinafter mentioned, and subject to confirmation by the said Superior Court, all the right, title, interest and estate which the above named decedent had at the time of her death, as well as all the right, title, interest and estate which has by operation of law or otherwise accrued to the estate of said decedent since the date of her death, in and to the following described property, towit:

All those certain lots, pieces or parcels of land situate, lying and being in the County of San Mateo, State of California, and more particularly described as follows, to-wit:

PARCEL No. 1

Lots One (1), Two (2), Three (3), Ten (10), Eleven (11) and Twelve (12) in Block Eighteen (18) as designated on the map entitled: "San Carlos, San Mateo Co., Cal.," which map was filed in the office of the Recorder of the County of San Mateo, State of California, on September 4, 1888, in Volume "B" of Maps at page 19, and a copy thereof entered in Volume 1 of Maps at page 76, excepting therefrom the southerly twenty (20) foot strip devised to the Town of San Carlos, in the Codicil to the last Will and Testament of the said Mary Hooker Smith, also known as Mary H. Smith, deceased, said twenty (20) foot strip being the southerly twenty (20) feet of said Lots Nos. one and twelve along Cypress Street.

PARCEL No. 2

Lot Four (4) in Block Twenty-two (22) as the same is designated and delineated on that certain map entitled: "Map of San Carlos, San Mateo Co., Cal.," filed for record in the ~~office~~ of the County Recorder of said San Mateo County on the 4th day of September, 1888, in Map Book "B", page 19, and copied in Map Book 1, page 76. Also all the right, title and interest in and to a certain water pipe line running along the western side of Elm Street from a main water pipe in Cypress Avenue in said Town of San Carlos to the said Lot Four (4) in Block Twentytwo (22), and all right, title and interest in and to all water diverted, conducted and used through said pipe line, possessed by Margargaret B. Cooper, a widow, which has been deeded to Mary Hooker Smith by deed date March 22, 1912, and recorded March 25, 1922.

PARCEL No. 3

Portion of Lot Nine-B (9-B) in Block Eighteen (18) as designated on the map entitled: "Amended Map of the Town of San Carlos, San Mateo County, Cal.," which map was filed in the office of the Recorder of the County of San Mateo, State of California, on October 7, 1912, in Volume 8 of Maps at pages 25 and 26,—more particularly described as: Commencing at a point on the northerly line of Lot Ten (10) in Block Eighteen (18), as shown on the map above referred to, at a point distant thereon eleven (11) inches from the easterly line of Walnut St.; thence running easterly along said northerly line of said Lot Ten (10) one hundred fifty-four (154) feet one (1) inch; thence at a right angle northerly one (1) foot (1) inch; thence running westerly on a straight line to a point eleven (11) inches easterly from the east-ly line of Walnut Street; thence running southerly on a straight line one (1) foot nine (9) inches to the point of commencement. Being that portion of Lot Nine (9) in said Block Eighteen (18) now enclosed by the fence of Mary Hooker Smith, a widow.

PARCEL No. 4

Commencing at the intersection of Arroyo Avenue with Cypress Street at a point on the southeasterly line of Cypress Street, fifty (50) feet in a southwesterly direction from the Westerly corner of Block Thirty-seven (37); running thence southeasterly along the southerly line of Arroyo Avenue a distance of thirty (30) feet; thence running southerly in the shortest and most direct line to the center of Las Pulgas Creek thence running up said Las Pulgas Creek to the extreme southwesterly corner of the lands of the San Carlos Land Company; thence running northeasterly along the southerly side of Cypress Street to the place of beginning; together with all rights, interest and title of the San Carlos Land Company to the springs, wells and water flowing, gathered or to be gathered in Las Pulgas Creek at or near the said southwest corner of the lands of the San Carlos Land Company, together with the water pipe running from said springs and wells, and the right of way for water pipe (as now laid down) along the line of said creek, and running from said creek in a northerly direction across Arroyo Avenue, across the easterly corner of Lot Three (3), Block Thirty-seven (37), across Sycamore Street, across Block Thirty-six (36), across Cedar Street, and across Lot Twelve (12), Block Thirty-three (33) to Cypress Street, and down Cypress Street to the foot of said street to the Southern Pacific Railroad Company's depot.

Subject to that certain agreement entered into by and between the San Carlos Land Company, party of the first part, and T. G. Phelps, party of the second part, dated September 3, 1888, which agreement conveyed to the party of the second part the right to one-quarter (¼) of the water from the property hereabove described.

PARCEL No. 5

Portion of Lots Two hundred seven (207) and Two hundred sixteen (216), as designated on the map entitled: "Plat of the Lands of the Menlo Park Villa Association Southern Portion of Pulgas Rancho San Mateo County" which map was filed in the office of the Recorder of the County of San Mateo, State of California, on September 14, 1863, in Volume "C" of Maps at page 6, and a copy thereof entered in Volume 2 of Maps at page 40 ,more particularly described as:

Commencing at the point of intersection of Glenwood Avenue and Laurel Street; thence northeasterly along Glenwood Avenue two hundred eighty (280) feet, four (4) inches; thence at right angles northwesterly five hundred fifty-four (554) feet five (5) inches; thence at right angles southwesterly two hundred eighty (280) feet, four (4) inches to Laurel Street; thence along Laurel Street five hundred fifty-four (554) feet five (5) inches to the point of commencement. Containing three and fifty-seven hundredths (3.57) acres, more or less. The above measurements includes one-half of the width of said Avenue and Street, which are severally sixty-five (65) feet six (6) inches in width.

The terms and conditions of sale are as follows: Cash in gold coin of the United States, ten (10) per cent. of the amount bid to be paid at the time of acceptance of bid, and the balance on confirmation of sale by the said Superior Court; deeds and instruments of title at the expense of purchaser; commission not exceeding five (5) per cent to be allowed to a real estate broker whose bid is accepted by the Court.

All bids and offers must be in writing and may be delivered to the undersigned executor, personally; or left at the office of the "Times-Gaette", 61 Broadwey, Redwood City, California, or may be filed in the office of the Clerk of said Court above named at any time before the making of the sale.

Dated: San Francisco, this 17th day of June, 1926.

A judgment and decree of this Court, establishing and quieting its title in and to said parcels of said real property hereinbefore described, and determining all estates, rights, titles, interests, liens and claims of every kind and nature whatsoever in and to said real property and every parcel thereof, and declaring plaintiff to be the owner in fee simple of said parcels of said real property nd of every part thereof; and that it be decreed that no other persona have any right, title intrest or llen in and to said parcels of real property, or any part thereof;

That plaintiff recover its costs herein, and that plaintiff have such other and further relief as may be meet and proper in the pemises.

WITNESS my hand and the seal of said Court this 4th day of June, A. D. 1926.

ELIZABETH M. KNEESE,
(SEAL) Clerk.
By ANNIE BULLIVANT, Deputy Clerk.

MEMORANDUM

The first publication of this Summons was made in the "Times-Gazette," a newspaper, on the 5th day of June, 1926.

First publication June 5th; last pulication August 7th, 1926.

BEFORE THE HON. BOARD OF SUPERVISORS, COUNTY OF SAN MATEO, CALIFORNIA.

In the Matter of the Establishment of the South San Francisco Drainage District.

To the Hon. Board of Supervisors, County of San Mateo, California.

We, the undersigned, being the owners of a majority of land within a district proposed to be organized under the Drainage District Improvement Act of 1919, Statutes of 1919, P. 731, which district contains a body of wet, swamp or overflowed lands, susceptible of drainage by a ditch or drain or a system of ditches or drains, and which said district is to be benefited by the construction of the improvements hereinafter set forth, hereby petition your Honorable Board, to establish such a ditch or drain or system of ditches or drain, for the draining of said body of lands.

The boundary of the district proposed to be benefited and the boundaries of such body of lands proposed to be drained, are as follows:

BEGINNING at the intersection of the Westerly line of Chestnut Avenue with the Southerly line of Commercial Avenue in the City of South San Francisco;

Running thence Easterly along the Southerly line of Commecial Avenue to the Westerly line of Orange Avenue; thence along the Westerly line of Orange Avenue and its projection Southerly to the Southerly line of the Right of Way of the Southern Pacific Railroad Company Baden Branch; thence Easterly along the Southerly line of said Baden Branch Right of Way to the Westerly line of the South San Francisco Lumber & Supply Company 3.714 Acre Tract; thence South 15 degrees 33 minutes West 325 feet; thence S 74 degrees 27 minutes East 1252.54 feet to the Southeasterly corner of the California Iron Yards 5.63 acre tract; thence in a straight line to the Southwesterly corner of the Prestolite Company 4.22 acre tract; thence Easterly along the Southerly line of said 4.22 acre tract and its production Easterly to the centerline San Bruno Road; thence Southerly along the centerline of San Bruno Road to a point that is distant South 13 degrees 20 minutes 16 second West 1017.11 feet from a granit monument No. 5 on San Bruno Road; thence South 59 degrees 27 minutes East 640.48 feet; thence on a curve to the left having a radius of 1750 feet a distance of 946.84 feet; thence North 89 degrees 33 minutes East 180 feet; thence South 0 degrees 27 minutes East 100 feet; thence South 89 degrees 33 minutes West 180 feet; thence on a curve to the right having a radius of 1850 feet a distance of 1000.95 feet; thence North 59 degrees 27 minutes West 973 feet more or less to the Westerly line of the Right of Way of the Southern Pacific Railroad Company (Bay Shore Branch); thence Southerly along the Westerly line of said Right of Way to its intersection with the Northerly line of the Union Oil Company 0.82 Acre Tract; thence Westerly along said Northerly line to the Easterly line of the County Highway known at R1, D1, S2, San Mateo County Highway, also known as Linden Avenue Extension; thence Northerly along the Easterly line of said Highway to a point that is distant 376.15 feet Northerly from a concrete monument that is set to mark the beginning of the curve at the Union Oil Company plant;

Thence at right angles Westerly 60 feet to the Westerly line of said highway; thence the following courses and distances: North 74 degrees 48 minutes West 685 feet; North 50 degrees 38 minutes West 2230 feet; North 9 degrees 26 minutes West 443.6 feet; North 67 degrees 44 minutes West 487.7 feet; North 44 degrees 15 minutes West 302.5 feet and North 76 degrees 10 minutes West 363 feet to a point in the Easterly line of the Right of Way of the Valencia Street Branch of the Southern Pacific Railroad Company where said Easterly Right of Way line is intersected by the Southeasterly line of the subdivision known as the "Town of Baden" projected Northeasterly; thence Northwesterly along the along the Westerly line of Mission Road to a point where said line is intersected by the Easterly line of the C. P. Regli 4.168 Acre Tract if extended Southerly; thence Northerly along said Southerly extension and said Easterly line of said Regli 4.168 Acre Tract to the Southwesterly corner of the G. Uccelli 1 acre tract; thence Easterly in a staight line to a point in the Southeasterly line of the G. Uccelli 4.047 Acre Tract where said line is intersected by the production Northwesterly of the Northeasterly line of the South San Francisco Water Company 9.2 Acre Tract; thence Southeasterly along said Northwesterly production and along said Northeasterly line of said 9.2 Acre Tract to the Westerly line of Chestnut Avenue; thence Northerly along said Westerly line of Chestnut Avenue to the point of beginning.

The approximate location of the proposed ditch or drain or system of ditches or drains is as follows.

NEWS REVIEW OF CURRENT EVENTS

Iowa Shows Her Resentment Over Farm Neglect by Retiring Cummins.

By EDWARD W. PICKARD

NOT because of any especial liking for Smith Wildman Brookhart nor because of any especial animosity toward Senator Albert B. Cummins, but in order to express their resentment against the administration's attitude toward farm relief legislation. That is the generally accepted explanation of the action of the Iowa Republicans, who in the primary last week voted the veteran Cummins back to private life and named the radical Brookhart to succeed him. The fact that Mr. Cummins had broken with the administration so far as to support the measure demanded by the corn belt did not suffice to save him. The unofficial canvass of the vote gives Brookhart a plurality of about 70,000. Running third was Howard J. Clark, who may stand as an independent Republican candidate in November.

At the White House and among the closest friends of the President the defeat of Cummins was considered the result of a factional fight stirred up by the unseating of Brookhart and not a repudiation of the President on the question of farm legislation. Perhaps incidentally, Cummins is another pro-World-court senator to be refused re-nomination.

An analysis of the Iowa vote, compared with usual votes in that state, indicates that a lot of Democrats voted as Republicans for Brookhart, the supposition being that they believed he would be more easily defeated in November than would be Cummins. Most of the rest of the Democrats cast their ballots for Claude Porter, and the party leaders there and in Washington declare he will have an easy victory because, as they assert, many Republicans will vote for him, just as they did for Dan Steck, against Brookhart. That there will be enough defections from Brookhart to affect the result is denied by the Republican managers. However, even if Brookhart is elected, the G. O. P. may be considered virtually to have lost a seat in the senate, for he cannot be counted on in the matter of party regularity.

UNMOVED by the Iowa primary result, the administration is still flatly opposed to the corn belt price stabilization measure, and the prospects for farm relief legislation at this session of congress were decidedly faint last week. The farm bloc leaders submitted their surplus control plan to Secretary of the Treasury Mellon for an opinion of its soundness and hoped that if he looked on it with favor the President might be won over. But the corn belt senators and the cotton states senators could not get together, the Southerners saying they would not support the measure if the equalization fee were to be made applicable to cotton at once. They might fall into line if this application to cotton were deferred two years and made optional then, and if one-half of the proposed $150,000,000 revolving fund were allocated to the cotton market operations. This, the corn belt men said, was impossible.

Senator Fess of Ohio opposes the McNary-Haugen bill partly because it would, in his opinion, be favorable to British rather than to American interests. He said it would "sovietize the great agricultural industry" in America and assure Great Britain a cheap food supply, transferring that nation's unemployment problem to the United States.

FLORIDA'S primaries, according to unofficial figures, gave re-nomination to Senator Duncan U. Fletcher. More interesting was the apparent defeat of Mrs. Ruth Bryan Owen, daughter of the Commoner, for the congressional nomination in the Fourth district, which includes Miami. Incomplete returns showed that Congressman William J. Sears had been renominated, but Mrs. Owen's managers charged irregularities in several counties and said a contest would be made if the returns did not show her the winner.

SENATOR REED'S campaign investigating committee is now at work and already has found that the Pennsylvania Republican primary expenditures were far up in six figures—perhaps as much as a million. Representative Vare and Governor Pinchot both were on hand for the opening of the hearing, and expenditures made on behalf of the latter's candidacy, listed at more than $160,000, were the first to get into the record, but toward the end of the session $500,000 was mentioned in connection with the Pepper campaign. Pinchot's campaign treasurer, P. S. Stahlnecker, said he had been told by Representative Morin, western Pennsylvania manager for Representative Vare, that an "under-cover man" the Vare forces had in the Pepper headquarters at Pittsburgh had informed him that the budget fixed by the senator's organization amounted to $500,000.

THOUGH the senate judiciary committee reported that the recent Presidential order authorizing the use of state and city peace officers as federal prohibition officers is valid and legal, Treasury department officials announced that there was no intention of invoking the power at this time. Indeed, they admitted that the plan had been practically abandoned. The majority report of the committee in effect held the order was valid but meaningless. Senators King and Caraway denied its legality.

The Republican steering committee refused to place on the senate program the Goff bill designed to strengthen the Volstead act, and so practically shelved it for this session. Senator Wadsworth of New York, chairman of the committee, announcing this action, issued a statement demanding repeal of the Eighteenth amendment. He defied the drys who are planning to defeat him next November, with F. W. Cristman, and declared he was wet to the core.

"While I advocate modification," he said, "I do not believe modification of the Volstead act within constitutional limits will solve the problem permanently. I think we must go back to the Eighteenth amendment itself and substitute for it a simple grant of power to congress. That done, I should hope that some system, such as the one now prevailing in Quebec, could be set up in this country."

Illinois drys, who are fighting Brennan's modification referendum plan, were decidedly pleased with Wadsworth's admission that modification would not solve the question.

MEMBERS of the League of Nations committee on the opium traffic were roused to anger in their meeting in Geneva by Arthur Woods, former police commissioner of New York, when he strongly denounced the committee for not recommending any action to curb the drug traffic. The committee, he declared, had ignored the only solution offered, which is government ownership or control of all factories handling derivatives of opium and coca leaves and the strictest control on the destination of all drugs shipped out with records kept of the names and addresses of the consignees.

Holland is the chief manufacturer of morphine, cocaine and heroin, so it was Herr Van Betton of that country who arose to say: "It is unjustifiable that Mr. Woods comes here for the first time and tries to force all his ideas into the report. I protest energetically against attaching such importance to his statements."

Chairman Bourgeois said he would try to get Mr. Woods to tone down his statement, but the New Yorker declared afterward he would not alter his report and the committee could take it or leave it.

WHEN the League of Nations council opened its sessions in Geneva it appeared that the quarrel over permanent seats was to be continued. The Brazilian member was absent, nominally ill, and Spain was represented only by an underling. Next day Senor Franco, the Brazilian, appeared, however, and announced that his government had decided to withdraw from the council. The Spanish representative's substitute gave notice that Spain would quit the council in September unless it were given a permanent seat. It is believed both will resign from the league. The council arranged a conference of World court members to consider the American reservations.

FRANCE'S cabinet has been engaged in desperate efforts to save the franc, whose value dropped Wednesday to about 33 to the dollar, and after a lot of talk about food rationing and other severe measures, it decided to lift all restrictions on the export of capital, giving freedom of movement to the national currency. The coupon system, calling for the name and address of owners of all stocks, bonds, and other securities to insure taxation, was abandoned. French business will revert to the ordinary bearer paper, which does not disclose the identity of the owner. Further employment of the country's gold reserve to sustain the franc was also abandoned, the government deciding to hoard bullion as a guarantee of credits and the eventual creation of a new currency. In adopting this plan the cabinet yielded to the opinion of expert bankers and conciliated the Bank of France. It was certain that a fight in the parliament would result, for the Socialists, radicals and communists consider the coupon system their pet scheme for insuring the taxation of the rich.

CHICAGO is making elaborate preparations to take care of the international Eucharistic congress the week of June 20 and Roman Catholics by the thousands are on their way there from all parts of the world. Every steamship from Europe brings numbers of eminent churchmen and prominent laymen who will take part in the impressive ceremonies in Chicago and in Mundelein, a suburb built by the Catholic church. Chief of the princes of the church there will be Cardinal Bonzano, sent by the pope as his legate. It is expected the congress will attract more than a million visitors to Chicago.

DISPATCHES from Tangier tell of the appearance of a new leader of revolt against Spain and France to take the place of the fallen Abd-el-Krim. He is Ouldfar, a brigand chief of the Djeballas, and already his men have captured Chechaouen, the sacred city of northern Morocco, and massacred its Riffian garrison. Though the Djeballa tribes are making war on the Riffs, they also hope to drive out the French and Spanish.

SECRETARY MELLON announced that, owing to the volume of revenues coming in to the treasury, the usual June financing in the form of issuing treasury securities would not be necessary. He said there had been increases in most items of receipts, especially in income taxes, and the treasury thereby was enabled to do away with a quarterly fiscal operation for the first time in more than eight years. The treasury will be able to go through to the middle of September without issuing new securities. There were indications at the treasury that the surplus for the fiscal year ending June 30 will approach $275,000,000, or about $20,000,000 greater than last year.

BRIEF items of interest:

Ukrainians of East Galicia, who demand autonomy, have been fighting Polish government troops.

Zaghloul Pasha refused the premiership of Egypt and the place was given to Adly Pasha, friend of Great Britain.

Chicago-Minneapolis air mail route was opened; Pilot Elmer Partridge was killed on his first trip.

Admiral C. F. Hughes was appointed commander in chief of the United States fleet.

President Coolidge plans to leave Washington for his vacation in the Adirondacks about July 4 if congress has adjourned by that date.

Director of the Budget Lord asked an appropriation of $325,000 for a new roof for the White House and $25,000 for the President to pay rent while the repairs are being made, next summer.

Pacific's Bed Quivers Near Acapulco, Mexico

Washington.—Again the bottom of the Pacific ocean south of Mexico has shaken itself, this time in the earthquake which occurred at 2:17 p. m., eastern standard time, on Saturday, June 5. This announcement was made by seismologists of the United States coast and geodetic survey here after studying reports made to Science Service from seismograph observations at Georgetown university, Washington; Regis college, Denver; St. Louis university, St. Louis; Fordham university, New York, and the Dominion observatory, Ottawa, Ont.

The epicenter, or point of greatest disturbance of the quake, was said to have been at approximately 8 degrees north latitude and 103 degrees west longitude. This is a region off the coast of Central America and about 600 miles in a southerly direction from Acapulco, Mex., where earthquakes are frequently recorded, the last one having occurred on May 11.

The announcement was also made that a quake occurred at 9:46 a. m., eastern standard time, June 3. It was located at approximately 6 degrees east longitude, in the vicinity of the Solomon islands.

The epicenter of the quake was located by reports to Science Service from seismograph stations at Fordham university, Georgetown university, the Meteorological observatory at Victoria, B. C., and the United States coast and geodetic survey station at Honolulu, T. H.

The WATER BEARER

CHAPTER IX—Continued

—13—

"I kept the check. It was coming to me. And I'm going to have a good time on it. It won't pay up what I owe, or begin to. Square me with the club, though, for one thing."

He left and Caleb in turn changed his clothes and spent a couple of hours reviewing his plans. At the water company he noticed Mary Morgan driving away at her typewriter. Her expression was sullen and she did not look up, though she heard his name mentioned. Caleb wondered what she thought of the wedding.

He found his model set up on a long table in the directors' room that opened off Cox's private office. Cox and Hinckley were examining it. They greeted him cordially, Hinckley in particular giving him a cordial grip of the hand.

"Suppose you go over the general plan, Warner," suggested Cox. "Then we'll talk. We want to know how you arrive at your premises."

Caleb described simply his belief that the whole of Caliente plain formed a great bowl of gravel with bottom and sides of clay, with a roof of clay at the upper end that caused artesian wells. He went over his operations and displayed his maps. He had felt a certain diffidence about the water-divining, doubting whether his hearers might not scoff at proof built up of such means. But Hinckley accepted it and Cox nodded his agreement.

Hinckley spoke first after Caleb's final summing up. And he spoke with a sincerity that held no trace of jealousy.

"I congratulate you. I should have liked to have made that discovery myself. But there is one big obstacle that exists. It is the flaw, if there is a flaw, in your plan."

"I mean the powerful action of the tides upon any pipes which may be laid upon the bay bottom. It shallows at the south end and the six-foot rise and fall has great swing there. There is your weak point. It may be overcome, but it will need a special invention, I am convinced."

"I had thought of that and I have a suggestion," said Caleb. "It is not perfected. I have not had time. But I am sure the idea is a sound one."

"Well," summed up Cox, "so far, I think we may say that your project interests us, Warner. I must add my congratulations to those of Hinckley. It looks as if your visit to the coast was going to be fortunate to all concerned. I am going to call a directors' meeting. I cannot set a date now. They are all busy men, with other interests than this company.

"I should say a fortnight should prove sufficient. I'll let you know at the earliest moment. Perhaps that two weeks will enable you to work out your idea about the pipes. Keep in touch with us through Mr. Hinckley. You can rely upon his co-operation."

They both accompanied him from the big room. Hinckley gave him his private address and invited him to come there any evening for consultation.

Caleb had some other business to attend to down town and he got back to the apartment house in fine feather.

He found Baxter there. He had just come from the club, he said moodily. Caleb saw that he had been drinking. His face was flushed and he was in bad humor.

"I'm wiped out," he said. "The bottom dropped out of the market. Some of Cox's d—d manipulation! The tip was that they were driving down the stock to buy cheap and we were prepared for that. But they were unloading. My thousand went for margins. I'm clean. And I'm up against it."

He went to his bureau and took up the silver frame with Mary Morgan's picture in it. He took out the photograph and tore it into small pieces, which he tossed into a waste-paper basket.

"D—n her!" he said savagely. "She's the last straw. Getting ugly—in more ways than one!"

"You owe her something," said Caleb.

It was a slip that he realized immediately by the deepening scowl on Baxter's forehead.

"Owe her something?" he exploded. "A lot you know about it! You are like most preachers, you prate without experience. I may be a sinner, but she's no saint. She wasn't when I met her. The things we did were done mutually in full knowledge of the risks, because we wanted to do them. Now she's pinned this thing on me, with some cause, perhaps, but I'm not feeling paternal about it, I can tell you. And I don't intend to marry her. That's flat and final. Owe her something? Maybe I do, but it can only be paid with money and where's that coming from?"

"I didn't mean to preach, Ted. As for money, if she'll accept it, there's your land deal. It's easy for you to make money, Ted, if you buckle down to it and cut out the drinking."

"Preaching again," cried Baxter. The liquor he had been taking had a stronger, a more malevolent hold on him than ever before in Caleb's knowledge of him. The veins were swollen in face and hands and his eyes were slightly glazed, though his speech was fluent and clear enough. "I've taken more man-sized drinks this afternoon than you have in your whole life," he went on. "The stuff I swallowed out on the boulevard this afternoon would drive a man crazy in time, but that's all we can get."

"Look here, Ted, you're talking nonsense," said Caleb. He was beginning to feel nettled, the blood ran hot under the skin of his forehead. The day had gone too well to wind up in such fashion. He went into his own room to escape the threatened tirade. Baxter followed him, bent on argument, his mind set in one groove. He seated himself in a wicker armchair.

"I suppose you think I ought to marry the girl? Tie myself up with a whining wife and a kid?"

"Yours?"

"Maybe. I'm not even sure of that. No, I'm not. I can handle her if I do it right away," said Baxter with ever thickening speech. "But by the time my deal goes through it may be too late. Those things hang fire sometimes. Lend me the money, Cal'. Twenty-five hundred 'll do it. She's ready to cut loose and go east. If I tell her it's fallen through she'll turn nasty again. Will you do it?"

"I can't Ted, I haven't the money."

"You mean you won't. Why don't you come through and say what you mean?"

"I have. If I had the money, or could get it, I would lend it to you."

"Ah! That's what they all say, when it comes to a showdown. If you think you're going to force me to marry the girl, you're wrong. You seem d—d eager to take her side in the matter. If you're so anxious to save her good name, why don't you marry her yourself?"

Baxter got up, swaying a little. His eyes were now bleared. The poison he had been assimilating was forcing its venom to the surface. Caleb stepped forward to put his hands on the other's shoulders, partly to steady him, with the idea of coaxing him to lie down. Half blind with crudely doctored alcohol, Baxter mistook Caleb's intention and swung his fist viciously. Caleb's own temper had been mounting despite his efforts for control. He was tired and his nerves had been strained more than he suspected. He parried the blow and thrust Baxter back, meaning to pinion him in the chair while he talked some sense into his sodden brain.

There Were Some Thirty People In the Room and They All Seemed to Be Laughing and Talking at Once.

But Baxter twisted. His weight went all upon one arm and the light chair overturned. Clutching at the rickety little desk, Baxter scrambled on the floor in a shower of papers as the desk toppled. The fall seemed to temporarily sober him. He scrambled to his knees and began picking up the papers as Caleb righted desk and chair, ashamed of the brawling termination of the affair.

"Look here, Ted," he said, catching Baxter by the elbow. "This has gone far enough. We are both acting like a couple of chumps. If I've . . ."

But Baxter stood staring at one of the papers he had picked up. His face was contorted by a malevolent sneer.

"You haven't got the money, eh?" he said. "A fine friend you are. You rotten liar. I'm through with you!"

He flung the paper down on the top of the desk and flung through the door, his face livid. Caleb heard his own door slam as he picked up the slip. It was the telegram from his attorney announcing the closing of the deal and the forwarding of the money.

For a second he stood irresolute. He did not want to explain to Baxter why he could not lend him any of this amount, or to what use he had already put it. Finally he made up his mind. His friendship with Baxter had been largely protective. He did not want to abandon that friendship now when Baxter most needed him.

He knocked on the door, then tried it. The key had been turned on the inside. He called.

"Ted! let me in for a minute."

"You go to h—l." A moment after, the door to the corridor slammed. Caleb went to his own and saw Baxter entering the elevator. He rang the bell, hoping that he might catch the other before he got too far down the street.

The colored boy grinned at him as the elevator came to rest at his floor.

"Want to catch Misteh Baxter, suh? I reckon you's too late. His cyah's bin waitin' fo' him fo' nigh ha'f an hour. He's gone a kitin'."

CHAPTER X

The Party

If Baxter came back that night Caleb never knew. Baxter kept the door of his room locked. Caleb heard him casually mentioned at the club as being on "a tear." Doctor Fields inquired for him once directly of Caleb.

"He'll get cirrhosis of the liver, if he keeps on," said the physician. "And he'll snuff out like a match in the wind. We must get him on the wagon. I'll try and scare him into it. Though there's real cause for the scare. He'll stay off the stuff for several months sometimes. There's just one thing he can't resist and that starts him off. Worst thing he could take. Champagne. Fortunately it's scarce and expensive. You'll understand my talking to you this way. They say you and Ted have been friends for a long time."

But Caleb doubted very much if Baxter would listen to him until his mood changed. And he was busy with his own problem of the pipes and the tides.

He had an idea of what was needed. If the bottom sloped evenly the big tug at his submarine pipeline would come in midchannel, looping it backwards and forwards. But, wherever there was a depression or a channel, his pipes would sag and great strain come on the joints. A flexible line—that was what he wanted. He worked over it daytimes and dreamed of it nights without coming to a practical solution. He wanted to complete his plan, to come before the meeting with all difficulties solved.

Then one day he received an invitation from the Vedders to a radio party.

"It will be quite informal," wrote Mrs. Vedder, "but I think you will enjoy it and we hope you can come. Some friends of yours will be with us, Betty Clinton and Carmen Wilson among them. Don't dress. Come any time after eight o'clock."

Caleb accepted. He found himself eager to do so at the mention of Betty Clinton's name. The afternoon of the appointed day the solution of the pipe problem came to him. It seemed to him that thoughts of the girl had blent with his tinkerings and drawings and quickened his invention.

He sketched out his idea and made some specifications that he took down to a working machinist with whom he had got in touch. A model was to be made. The thing was simple enough though an entire novelty in such work. Caleb intended to make his pipe junctions flexible by designing a ball and socket joint so that the curving ends of one pipe should be clasped in coinciding curves of another, working in soft babbitt metal, giving a play of almost ninety degrees. This would make the pipeline as limber as a sprocket chain, Caleb believed.

* * * * * * * *

The Vedders lived on Semaphore hill in a house that consisted of one great room on the ground floor together with a kitchen at one end and a conservatory porch at the other. An open staircase led to the upper floor and the bedrooms. A Japanese servant met him at the door, which was screened off from the main room, and relieved Caleb of hat and coat. There were some thirty people in the room and they all seemed to be laughing and talking at once, split up in little groups, on divans, standing by the fireplace, by the grand piano, about a table where the Japanese was now serving punch out of a great bowl of mandarin ware. Smoke trailed everywhere, from pipes, cigarettes, cigars and from sticks of Chinese punk.

(TO BE CONTINUED.)

Land of Endless Cold Unknown to Explorers

Northward beyond the tree limit is the land of endless cold, of eternal snow and ice—at least according to popular belief, and some textbooks still in use. But this story of eternal ice is an interesting myth. The facts of climate are quite different, says Tyros.

The Arctic winter is indeed long, dark, cold and stormy, but the actual number of inches of snowfall is less than in northern Virginia, for example. The cold, therefore dry, air of Arctic regions cannot produce much rainfall; in many places it is only ten inches or even less. The rainfall being light, the snow does not get very deep.

Believers in the snow-myth seem never to think of the intense heat of the Arctic summer, when the sun does double duty by shining also at night.

At 60 degrees north latitude the longest day has 18½ hours of sunshine. At 66 2-3 degrees north latitude, at the Arctic circle, the longest day has 24 hours of sunshine. At 70 degrees north latitude there are 73 days with continuous sunshine, unbroken save by clouds. At the pole there are six months of continuous daylight. Several hundred square miles of Arctic America have more than 30 days of continuous sun.

Brief Bootmaker

It was Thackeray who, when visiting Ireland, misunderstood the letters G.P.O. to mean "God Preserve O'Connell." But even in this age of letters, when newspaper readers are accustomed to decipher abbreviated form in news and advertisement columns, mistakes are easily made. A notice on a certain street door, for example, always excites interest. It runs: "J. X., B.S.M." Some rare university degree? No; merely an intimation that the occupant was a boot and shoe mender.

In the Forkless Days

Forks were not introduced into England till 1608, and it is a notable fact that whilst we get Knifesmith and Spooner amongst our occupative surnames, we find no Forker or Forksmith. Even the "Carver" had to use his fingers. In the Boke of Kervynge we find it set down, "Set never on fyshe, fleshche, beest, ne fowl, more than two fyngers and a thombe." The guest was lucky if he got a plate. Usually he was supplied with a round of bread known as a trencher upon which the meat was placed. It will be easy to understand why this was followed by the necessary services of the "ewer" with a basin of cleansing water and the "napier" who proffered the towel or napkin.—Manchester Guardian.

In the "Good Old Days"

In the days of female prize fights an English woman was reported to have floored her Jewish opponent 70 times, and after an hour and twenty minutes of fighting was declared the conqueror.

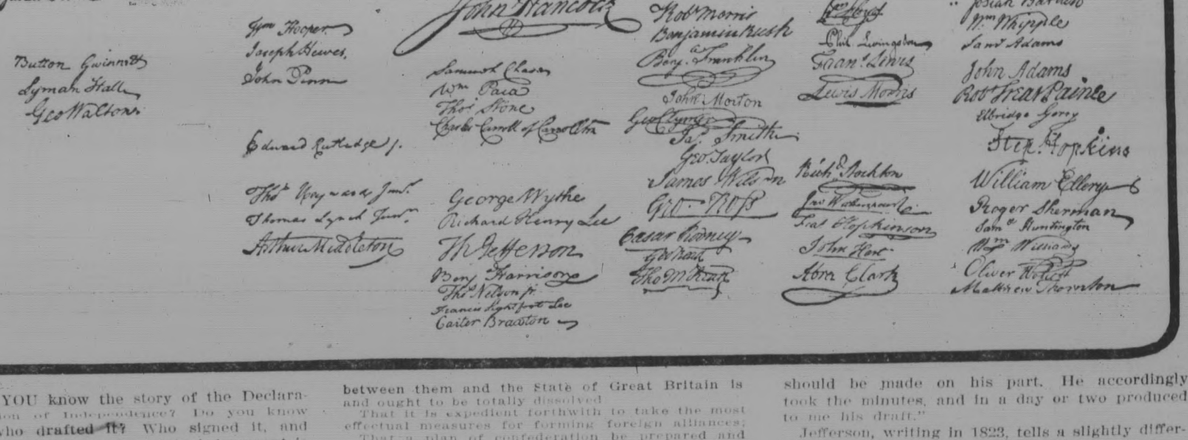
IN CONGRESS, JULY 4, 1776

The unanimous Declaration of the thirteen united States of America,

When in the course of human events it becomes necessary for one people to dissolve the political bonds which have connected them with another, and to assume among the powers of the earth, the separate and equal station to which the Laws of Nature and of Nature's God entitle them, a decent respect to the opinions of mankind requires that they should declare the causes which impel them to the separation. ——— We hold these truths to be self-evident, that all men are created equal, that they are endowed by their Creator with certain unalienable Rights, that among these are Life, Liberty and the pursuit of Happiness. — That to secure these rights, Governments are instituted among Men, deriving their just powers from the consent of the governed, — That whenever any Form of Government becomes destructive of these ends, it is the Right of the People to alter or to abolish it, and to institute new Government, laying its foundation on such principles, and organizing its powers in such form, as to them shall seem most likely to effect their Safety and Happiness. Prudence, indeed, will dictate that Governments long established should not be changed for light and transient causes; and accordingly all experience hath shewn, that mankind are more disposed to suffer, while evils are sufferable, than to right themselves by abolishing the forms to which they are accustomed. But when a long train of abuses and usurpations, pursuing invariably the same Object, evinces a design to reduce them under absolute Despotism, it is their right, it is their duty, to throw off such Government, and to provide new Guards for their future security. — Such has been the patient sufferance of these Colonies; and such is now the necessity which constrains them to alter their former Systems of Government. The history of the present King of Great Britain is a history of repeated injuries and usurpations, all having in direct object the establishment of an absolute Tyranny over these States. To prove this, let Facts be submitted to a candid world. ——— He has refused his Assent to Laws, the most wholesome and necessary for the public good. ——— He has forbidden his Governors to pass Laws of immediate and pressing importance, unless suspended in their operation till his Assent should be obtained; and when so suspended, he has utterly neglected to attend to them. ——— He has refused to pass other Laws for the accommodation of large districts of people, unless those people would relinquish the right of Representation in the Legislature, a right inestimable to them and formidable to tyrants only. ——— He has called together Legislative bodies at places unusual, uncomfortable, and distant from the depository of their public Records, for the sole purpose of fatiguing them into compliance with his measures. ——— He has dissolved Representative Houses repeatedly, for opposing with manly firmness his invasions on the rights of the people. ——— He has refused for a long time, after such dissolutions, to cause others to be elected; whereby the Legislative powers, incapable of Annihilation, have returned to the People at large for their exercise; the State remaining in the mean time exposed to all the dangers of invasion from without, and convulsions within. ——— He has endeavored to prevent the population of these States; for that purpose obstructing the Laws for Naturalization of Foreigners; refusing to pass others to encourage their migrations hither, and raising the conditions of new Appropriations of Lands. ——— He has obstructed the Administration of Justice, by refusing his Assent to Laws for establishing Judiciary powers. ——— He has made Judges dependent on his Will alone, for the tenure of their offices, and the amount and payment of their salaries. ——— He has erected a multitude of New Offices, and sent hither swarms of Officers to harass our People, and eat out their substance. ——— He has kept among us, in times of peace, Standing Armies, without the Consent of our Legislatures. ——— He has affected to render the Military independent of, and superior to, the Civil power. ——— He has combined with others to subject us to a jurisdiction foreign to our constitution, and unacknowledged by our laws; giving his Assent to their Acts of pretended Legislation: — For Quartering large bodies of armed troops among us: — For protecting them, by a mock Trial, from punishment for any Murders which they should commit on the Inhabitants of these States: — For cutting off our Trade with all parts of the world: — For imposing Taxes on us without our Consent: — For depriving us, in many cases, of the benefits of Trial by Jury: — For transporting us beyond Seas to be tried for pretended offences: — For abolishing the free System of English Laws in a neighbouring Province, establishing therein an Arbitrary government, and enlarging its Boundaries, so as to render it at once an example and fit instrument for introducing the same absolute rule into these Colonies: — For taking away our Charters, abolishing our most valuable Laws, and altering fundamentally the Forms of our Governments: — For suspending our own Legislatures, and declaring themselves invested with power to legislate for us in all cases whatsoever. — He has abdicated Government here, by declaring us out of his Protection and waging War against us. ——— He has plundered our seas, ravaged our Coasts, burnt our towns, and destroyed the lives of our people. — He is at this time transporting large Armies of foreign Mercenaries to compleat the works of death, desolation and tyranny, already begun with circumstances of Cruelty & Perfidy scarcely paralleled in the most barbarous ages, and totally unworthy the Head of a civilized nation. ——— He has constrained our fellow Citizens taken Captive on the high Seas to bear Arms against their Country, to become the executioners of their friends and Brethren, or to fall themselves by their Hands. — He has excited domestic insurrections amongst us, and has endeavoured to bring on the inhabitants of our frontiers, the merciless Indian Savages, whose known rule of warfare, is an undistinguished destruction of all ages, sexes and conditions. In every stage of these Oppressions We have Petitioned for Redress in the most humble terms: Our repeated Petitions have been answered by repeated injury. A Prince, whose character is thus marked by every act which may define a Tyrant, is unfit to be the ruler of a free people. Nor have We been wanting in attentions to our British brethren. We have warned them from time to time of attempts by their legislature to extend an unwarrantable jurisdiction over us. We have reminded them of the circumstances of our emigration and settlement here. We have appealed to their native justice and magnanimity, and we have conjured them by the ties of our common kindred to disavow these usurpations, which would inevitably interrupt our connections and correspondence. They too have been deaf to the voice of justice and of consanguinity. We must, therefore, acquiesce in the necessity, which denounces our Separation, and hold them, as we hold the rest of mankind, Enemies in War, in Peace Friends. ———

We, therefore, the Representatives of the united States of America, in General Congress, Assembled, appealing to the Supreme Judge of the world for the rectitude of our intentions, do, in the Name and by Authority of the good People of these Colonies, solemnly publish and declare, That these United Colonies are, and of Right ought to be, Free and Independent States; that they are absolved from all Allegiance to the British Crown, and that all political connection between them and the State of Great Britain, is and ought to be totally dissolved, and that as Free and Independent States, they have full Power to levy War, conclude Peace, contract Alliances, establish Commerce, and to do all other Acts and Things which Independent States may of right do. — And for the support of this Declaration, with a firm reliance on the protection of divine Providence, we mutually pledge to each other our Lives, our Fortunes and our sacred Honor.



DO YOU know the story of the Declaration of Independence? Do you know who drafted it? Who signed it, and when? Where the original document is today?

This immortal document, a facsimile of which is reproduced above, will be 150 years old this month. Today the Stars and Stripes and the flag of Great Britain are intertwined in a bond of friendship. Let us go back and review the situation a century and a half ago.

Prior to the revolutionary struggle, the sentiment in the colonies for more than ten years was opposed to severance of relations with Great Britain. Even such memorable events as Paul Revere's ride and the battle of Lexington and Concord in April, 1775, had failed to arouse any widespread determination for independence. In July, 1775, the same Continental congress which had appointed Washington commander in chief of the army, drew up a declaration of the causes for taking up arms in which it was said: "We mean not to dissolve that union which has so long and so happily subsisted between us and which we sincerely wish to see restored."

Thomas Jefferson, the author of the Declaration of Independence, himself wrote two months after the battle of Bunker hill that he was "looking with fondness toward a reconciliation with Great Britain."

Historians point out that the colonists were the conservatives, and George III and the English parliament were the radicals in starting the American Revolution. Such men as Benjamin Franklin, Samuel and John Adams, and Patrick Henry had felt for a long time that a break was inevitable. The declaration of the citizens of Mecklenburg county, N. C., was one of the local events indicating the trend of public opinion toward independence. Not until the appearance of Thomas Paine's stirring pamphlet "Common Sense," however, early in January, 1776, was there any appreciable public sentiment in its favor.

This pamphlet, despite its faulty logic, explained the situation to the people as none of the more eminent political writers had done. It avoided constitutional technicalities, and in the plain language of the day presented the facts so that all could understand.

Paine suddenly found himself transformed from obscurity to fame. The Pennsylvania legislature voted him $2,500, and a southern legislator suggested that a statue to Paine in gold would not be too high an honor.

Things began now to move rapidly in the colonies. Six months after the appearance of Paine's pamphlet, Richard Henry Lee of Virginia rose in the Continental congress at Philadelphia on June 7, 1776, and presented his famous resolutions which quickly led to the Declaration of Independence. These resolutions, in Lee's handwriting, and now one of the treasured papers on the Library of Congress, were:

Resolved, That these United Colonies are, and of right ought to be, free and independent States; that they are absolved from all allegiance to the British Crown, and that all political connection between them and the State of Great Britain is and ought to be totally dissolved.

That it is expedient forthwith to take the most effectual measures for forming foreign alliances.

That a plan of confederation be prepared and transmitted to the respective Colonies for their consideration and approbation.

Here was a pure Declaration of Independence, proposed by one of the most eminent men of the most influential colonies at that time, and promptly seconded by John Adams of Massachusetts.

The next day congress went into a committee of the whole to consider the resolutions. Delegates from Pennsylvania, New York, and one or two other colonies, objected on the ground that the Middle colonies were not yet ready for so radical a step, although personally expressing a friendly attitude.

Congress realized that unanimous action by all the colonies on a question of such moment was of supreme importance. Several delegates had not been instructed to go so far as voting for independence, New York and New Jersey being among them. The majority had been authorized to take any action that might be considered wise. Virginia, on the other hand, had gone so far as actually to instruct her delegates to propose a declaration to congress. Richard Henry Lee was simply obeying his legislature when he presented his resolutions.

On June 10, congress postponed final consideration for three weeks, and on the following day appointed a committee of five to draw up a declaration. Lee surely would have been on this committee had he not in the meantime been called home at the illness of his wife. But for that the Virginian might have been the author of the Declaration of Independence, instead of his younger Virginia colleague, Thomas Jefferson, then but thirty-three years old.

Coming to congress with a reputation of wielding a facile pen, Jefferson in the balloting for the committee received a majority of votes and became its chairman. The others were Benjamin Franklin of Pennsylvania, John Adams of Massachusetts, Roger Sherman of Connecticut, and Robert R. Livingston of New York.

Stories differ as to how Jefferson came to be selected to write "the one American state paper" as has been said, "that has reached to the supreme distinction in the world and that seems likely to last as long as American civilization endures." One account is given by John Adams, who said that he and Jefferson were appointed by the committee to prepare the rough minutes in a proper form. When Jefferson first proposed that Adams prepare the draft of the Declaration, Adams declined, giving, as he says in his autobiography, the following reasons:

"(1) That he was a Virginian and I a Massachusettensian. (2) That he was a southern man and I was a northern one. (3) That I had been so obnoxious for my early and constant zeal in promoting the measure that every draft of mine would undergo a more severe scrutiny and criticism in congress than of his composition. (4) And lastly, and that would be reason enough if there were no other, I had a great opinion of the elegance of his pen and none at all of my own. I therefore insisted that no hesitation should be made on his part. He accordingly took the minutes, and in a day or two produced to me his draft."

Jefferson, writing in 1823, tells a slightly different story. He says that the entire committee urged him to make the draft. He showed it first to Franklin and Adams, who, in their handwriting, made a few minor alterations. This original draft was given by Jefferson to Richard Henry Lee, the dean of the Virginia delegation, and in 1825 his grandson presented it to the American Philosophical Society of Philadelphia.

Making another copy, which incorporated the suggested changes, Jefferson presented it to the committee which reported it unchanged to the congress. On July 1, 1776, Philadelphia buzzed with excitement, for here was to be taken the most important step in a long series of disputes with the mother country.

The original resolutions of Richard Henry Lee came before the body as a committee of the whole. They were approved by a two-thirds vote, Delaware, Pennsylvania, and South Carolina being on the negative side. The New York delegates, having received no instructions, were unable to vote.

When the formal vote of congress was taken the next day, the resolutions were approved by twelve colonies—all except New York. Thus on July 2, 1776, the original colonies became the United States of America.

The next two days were spent in discussing the draft of the declaration as drawn by Jefferson. The debate was lively, but when it was over, the draft was adopted with very few changes. Of the twenty-eight specific charges brought against George III, only one was deleted. That was the one accusing the king of "piratical warfare" in permitting the capture and enslavement of human beings. This was not a just charge, for the slave trade had been carried on long before the reign of George III. One other paragraph, near the close, was omitted. Besides these, barely twenty lines were stricken out, and not a single addition of fact was made.

The Declaration of Independence was then unanimously adopted by the twelve colonies whose delegates were instructed to vote in its favor, on July 4, 1776, which henceforth became the recognized birthday of the new nation.

On July 9 word arrived at the headquarters of George Washington in New York that the Declaration had been ratified, and it was at once read to the soldiers and citizens. On the same day the New York assembly, in session at White Plains, gave its formal vote for independence, and for the first time the thirteen colonies were united in their common cause.

John Hancock, president of the congress, was the only member who signed the Declaration on July 4. An engrossed copy on parchment was ordered for all the delegates to sign. This was completed on August 2 and signed by 54 delegates. Two others signed later, Thomas McKean of Delaware, who was absent with his regiment in August, and Matthew Thornton of New Hampshire, who was not elected to congress until the autumn. He was permitted to sign the document in November, making the total number of the famous "signers" 56.

Webster's Tribute to Hero of Bunker Hill

"But—ah!—Him! the great martyr of this great cause! Him! the premature victim to his own self-devoting heart! Him! the head of our civil counsels and the destined leader of our military bands, whom nothing brought hither but the unquenchable fire of his own spirit; him! cut off by providence in the hour of overwhelming anxiety and thick gloom; falling where he saw the star of his country rise; pouring out his generous blood like water before he knew whether it would fertilize a land of freedom or of bondage! how shall I struggle with the emotions that stifle the utterance of thy name! Our poor work may perish, but thine shall endure! This monument may molder away; the solid ground it rests upon may sink down to a level with the sea, but thy memory shall not fail! Wheresoever among men a heart shall be found that beats to the transports of patriotism and liberty, its aspirations shall be to claim kindred with thy spirit!"—Daniel Webster's eulogy on Gen. Joseph Warren.

Hastened Revolution

The name "Boston Massacre" is popularly given to a street affray that occurred in Boston March 5, 1770, between the citizens and the British soldiery. The garrison, being annoyed by several hundred of the populace, who were pelting them with snowballs and otherwise embarrassing them, fired on the crowd, killing three and wounding several others. Among those killed was a negro, Crispus Attucks, looked upon as somewhat of a leader. The affair created intense excitement, and doubtless hastened the breaking out of hostilities. Until the beginning of the Revolution, five years later, the anniversary was celebrated, and the incidents of the day made the subject of oratory.—Kansas City Star.

NELLIE REVELL Says:

EVERY woman in the world dates her calendar from her first operation. In the years gone by they used to date all important events from the year of the big frost or the year the children had the measles. But now, I reckon, they don't have children, and, if they do, the children don't have measles. Nothing else stamps itself so indelibly on mamma's mind as her last operation, and every woman seems to have had one some time in her career.

The operationless woman would be as much out of style as a petticoat or a woman who doesn't roll her own (sox), and the way their imagination runs riot when they are describing it to their friends! A woman who wouldn't think of distorting the truth on any other subject just refuses to be hampered by facts during her organ recital and nine out of ten greet their post-operative visitors with a speech something like this:

"Oh, yes, I suppose I am looking pretty good today. But you should have seen me yesterday! The doctor was really frightened; he told me so today. I hadn't had one wink of sleep for five nights. Oh, yes, I'm glad I had the operation. The doctor says it was the worst case he ever had seen. If he had postponed it one hour longer nothing on earth could have saved me; and it was only my will power and the help I gave him that pulled me through. I was on the operating table six hours and have fifty stitches in me. I had to be etherized twice and the anesthetician says I take as much ether as a man does. You know men are harder to etherize than women, because the men are stronger minded. The doctors all say they never saw a patient so brave and one that could stand so much pain as I did. For they knew what I was suffering. I was unconscious three weeks. They wonder how I ever lived with all that was the matter with me. Of course, I'm glad it's over. It was the only thing to do, but it was terrible."

They all say it!

The old Roman epicureans thought that eating was the world's greatest indoor sport. But I'm sure none of them ever got such a thrill out of the dinner hour as I did the first time I looked at a menu card last fall after four years of table d'hote service in the hospital, and ordered from it just what I wanted. It was roast pork. Nor did any of them ever tingle with such exquisite happiness as I felt when the waiter presented the tab.

There was a time when I signed tabs in half the restaurants on Broadway, and the old order, it seemed to me, had returned. I was again a citizen and had, not a number, but a name. I signed the check merely "O. K. Revell," but if it had been the Declaration of Independence I should have been no surer that once again I had attained to freedom.

Before I was taken to the hospital I had lived forty-six years—a life I was in no way responsible for. I lived, as other people do, mostly because no one had killed me and I had not killed myself. But in the four and a half years of my illness I feel that I have earned the right to live. I have paid for my life with blood, scars, pains and tears. This life is mine. And it brings a feeling of achievement and victory that only those who have gone through it can experience. But it is a wonderful feeling.

Anyone who has a hankering to search out his family tree and discover how he happens to be here, had better first consult Senator Francis Murphy of vaudeville fame. It may prevent much embarrassment in the end. Mr. Murphy was telling me of the old Irishman of his acquaintance who felt sure he had descended from Brian Boru and finally saved enough money to go to the old country and look up his family tree. The senator ran into him on the street six months later.

"Well, Mr. Connelly," he asked, "did you find out anything about your family tree?"

"I did," said Connelly. "I found out enough so that if it will just let me alone, I'll let it alone."

If you had a "spinach-complex" and for five years was forced to eat it, at least once a day, till you loathed the sight of it, and just when you were arriving at the stage where you could give it the "ha ha" when you saw it on the menu, you acquired a brand-new nurse who sits at the table with you, and orders spinach twice a day and swears that she likes it—just how would you proceed?

DEAD SURE

Here lies the body of William Jay,
Who died defending his right of way;
For William was right and he sped along,
But he's just as dead as if he'd been wrong.

"The difference between the upper and lower classes," concludes Florence Flinn, "is that the former are tired in the morning and the latter tired in the evening."

"You can't make me believe we are not improving our minds," Carroll McComas asserts. "I have heard three persons quote Shakespeare and credit it to the Bible this week."

From Here and There

In the open ocean the tide wave is about four feet high.

Many natives in the Philippines still build their houses in trees.

Japan is the second largest user of electricity as a means of lighting.

The manufacture of feather fishlures is almost entirely done by hand.

A Dutchman by the name of J. B. Van Helmond discovered gas in 1609.

The sap, leaves and flowers of the century plant are commercially valuable.

FIRST
to develop and use the self-starter

The first practical self-starting and lighting system, the Delco, was invented in Dayton, Ohio, in 1910.

It opened a new era in the history of the automobile, extending its service to women, making night driving safe and *all* driving vastly more comfortable and secure.

Delco was first used by Cadillac, a General Motors car.

The inventor of Delco is today head of the Research Section of General Motors, whose personnel includes scientific leaders in every phase of automotive development.

General Motors operates the largest automotive research laboratories and proving ground in the world. They are added assurance that whatever is *best* and *soundest* in scientific progress will be found in General Motors products.

3 o'clock in the morning – no sleep yet!

INSURE your sleep against the pest of mosquitoes and early morning flies. Spray Flit.

Flit spray clears your home in a few minutes of disease-bearing flies and mosquitoes. It is clean, safe and easy to use.

Kills All Household Insects

Flit spray also destroys bed bugs, roaches and ants. It searches out the cracks and crevices where they hide and breed, and destroys insects and their eggs. Spray Flit on your garments. Flit kills moths and their larvae which eat holes. Extensive tests showed that Flit spray did not stain the most delicate fabrics.

Flit is the result of exhaustive research by expert entomologists and chemists. It is harmless to mankind. Flit has replaced the old methods because it kills *all* the insects—and does it quickly.

Get a Flit can and sprayer today. For sale everywhere.

News of Menlo Park

Receives Stanford Degree

Miss Marcella Frances O'Keefe on Monday graduated with honors from Stanford University, receiving ah A B degree. She majored in history. The young lady will take a summer course at the university and will teach next semester some school in the county. Miss O'Keefe made a brilliant record in scholarship at the university.

Dr. Whitewolf Leaves

Dr. Whitewolf will leave next week on a tour of the country to practice spiritual healing. He has made some wonderful cures in his time and hopes to arouse the people by his fervor, so that they may come back to religion and have faith in divine healing. The sick are urged to meet him. He will hold a meeting before leaving for the east.

Bequeaths Shortridge $20,000

By the terms of the will of the late John D. Spreckels, the sum of $20,000 is bequeathed to Samuel M. Shortridge who was a life long friend of the deceased and the money was given in appreciation of this lasting friendship. For many years Mr. Shortridge was the personal attorney for Mr. Spreckels. They both colloborated in politics. Mrs. Alexander Hamilton, her two sisters and four grandchildren will secure the greater portion of the twenty-five million dollar estate left by the deceased.

To Summer in Menlo Park

Mr. and Mrs. William Simpson of Chicago have taken the Herrick house at Menlo Park for five months and are established there. Yesterday Mrs. Herrick was hostess at luncheon.

Assigned to Sonoma Parish

Father Leon Bernard has been assigned to St. Francis church in Sonoma, where he will be assistant pastor. His appointment will be only temporary. Father Thomas Collins, who was ordained with Father Bernard, has been assigned to the Catholic church at West Berkeley.

Death of Mary Etta Stanford

After a long illness, Mrs. Mary Etta Stanford, mother of Mrs. Julius McClymont residing on Oak Grove avenue, passed away Saturday night at the McClymont home. She was a highly cultured woman beloved by all who knew her. The remains were taken to Eureka the family home for many many years, for burial.

Mrs. Stanford was a native of New York and was 84 years old at the time of her death. She was the widow of the late Judge Cyrus Stanford of Eureka. Her daughter, Mrs. Grace McClymont, survives her.

Returning to Menlo Park

Mr. and Mrs. Francis Crosby, who have been abroad for two months, are expected home early in July. They will pass the remainder of the summer at Menlo Park.

Menlo Graduates at Stanford

Among those who graduated from Stanford last Monday was Kenneth Loveland Ferguson, who majored in law. He is the eldest son of oJhn Ferguson, a former eMnlo Park young man and a grandson of the late Mrs. Jane Loveland, for many years postmaster of this place. His father is also a graduate of the university, where he majored in civil engineering and for many years has been in charge of large enterprises throughout the state.

United in Marriage at Stanford

Charles Parks, formerly assistant cashier of the Merantile Trust Company here, was united in marriage last Monday in Memorial chapel at Stanford to Miss Aileen Burks. Rev. D. Charles Gardner officiated. She graduated from the university and was given her degree just before her wedding which was attended by a large number of classmates. The young couple will live in Cody, Wyoming, where the groom's father is a leading banker.

Dies at Ringwood Park Home

L. Foster, a resident of Menlo Park for some years, passed away last week at his beautiful home in Ringwood Park. He was well known and liked by everyone who knew him. Some years ago he married the pretty Miss Fife, who survives him.

Addresses Chamber of Commerce

C. E. Kunze, the well-known newspaper man and lecturer, addressed the chamber of commerce last Monday evening, telling in eloquent language the possibilities of the peninsula and urging all to boost for it Mr. Kunze stressed the need of a good water supply which could only be secured from the Hetch Hetchy system. His talk was helpful and timely.

Wedded At Home of Aunt

The staid home of Mr. and Mrs. James D. O'Kane, that has often resounded with the mirth and glee in social ementities of other days, was the scene of a quiet wedding last Wednesday evening, when Miss Vilma Hales, the pertty and charming niece of Mrs. O'Kane was united in marriage to Matthias Knoeppel, a prominent resident of San Jose. Twenty-three guests were present to witness the ceremony and to congratulate the happy couple. It was strictly a home wedding.

At 8:30 o'clock the bridal party formed in the spacious library and to the sweet strains of "Lohengrin's Bridal Chorus, marched down the hall to the beautifully decorated parlor where the guests stood awaiting the approach of the bride and groom and attendants. They were met in the center of the room by Rev. Ralph P. Smith, who in a brief but impressive ceremony, made two hearts beat as one. The setting for the affair was beautiful and artistically arranged. To the rear of the parlor stood a massive floral decoration which added to the beauty of the ceremony. James D. O'Kane was the groom's attendent, while Miss Emma Knoeppel, the winsome sister of the groom, was the matron of honor. Congratulations being over the guests followed the bridal party to the spacious dining room of the grand old home, where a supmtuous supper was indulged in. The sparkling wit and repartee of Mrs. M. C. Reed of Belmont, added mirth and gayety to the merry scene, in which the happy couple was the cynosure of all eyes and both were the recipient of oceans of congratulations.

The pretty bride is a former resident of Menlo Park, having resided here with her aunt, while attending St. Joseph's Parochial school. She came from a pioneer family of Newcastle, but for some time has been a resident of San Jose, where she met her bethroded who is a cashier of the American Railway Express Company. She is unusually pretty and charming with a host of friends at the Garden City. The couple left at a late hour for the south.

Those present were William Hales, Newcastle, father of the bride; Mrs. M. C. Reed, Belmont; Rev. R. P. Smith; Miss Louise Knoeppel and Miss Emma Knoeppel, San Jose; Mr. and Mrs. L. Hendricks, Los Gatos; D. E. O-Keefe, James Glynn, Mr. and Mrs. M. Knoeppel, San Jose; Mr. and Mrs W. S. Hales, Sacramento; Mrs F. Campbell, Newcastle; Mr. and Mrs. E. McEtee, San Francisco; Mr. and Mrs. James D. O'Kane and of course the charming bride and groom were in evidence. The young couple will make their home in San Jose.

Louis Weber Drops Dead

Louis Weber, a resident of Stanford Park, for some years, dropped dead near his home on Thursday presumably of heart failure. He worked at Palo Alto for many years and was well known there.

Mrs. Susan Covelo, a native of Italy aged 26 years, passed away last Monday after a brief illness. She was the wife of M. Covelo, gardener for J. S. McClymont.

Monte Carlo, with Lew Cody, will be shown in the Menlo Theatre this evening; "The Runaway" tomorrow and "Mike" Monday. It's a scream the big 4-act vaudeville Tuesday is certain to draw a record crowd as will the program on Thursday that will be presented by the Menlo Improvement Club.

A lay retreat for ladies was completed yesterday at the Sacred Heart convent. Many from San Francisco and other places participated in the retreat.

WOODSIDE

There is no home in Woodside where more interesting people are entertained than the James Huddart home presided over by his sisters, Miss Clara and Miss May. People well known in the literary, musical and artistic spheres are constantly to be found finding their pleasure and taking their recreation at this beautiful estate of over a thousand acres, running to the top of the mountain and including lake and stream and forest. Among the latest visitors were Mr. and Mrs. Jules Mersfelder of Berkeley. Mr. Mersfelder is known throughout the country as one of the foremost landscape painters of the day, his canvasses giving much the same feeling of depth and power under restraint that one gets from the pictures of William Keith.

Mrs. Alanson Weeks is being visited by her father and mother, Mr. and Mrs. Harms of San Francisco. Mrs. Weeks gave a picnic luncheon party on Friday to a dozen little children, friends of her daughter, Leonie.

Carl Anderson and son, Ralph, have gone to Modesto to look after the fruit crop on Mr. Anderson's valley ranch.

Antone Davis has purchased the house immediately adjoining the fire house and will move into it with his family shortly. In case of fire valuable time may thus be saved by getting the fire fighting equipment under way in the least possible time.

Miss Phyllis Kroeck of San Francisco is visiting her aunt, Mrs. Joseph L. Ross, Jr.

Mrs. A. H. Audiffred has purchased a new Wyllis-Knight sedan.

Mr. and Mrs. Henry MacArthur of Palo Alto have opened their log cabin here and will spend the summer in Woodside.

James Sutton and family of San Francisco are occupying the Herbert Gollagher place while the Gallaghers are away on a visit to Canada.

The new house being built by Fred Mighall is a departure from the established form of California cottages and with its many gables and steep roof is reminiscent of the cottage architecture of Devonshire, England .

SEQUOIA ALUMNI HOLD ANNUAL REUNION, ELECTION

The annual reunion of the Sequoia Alumni Association and the election of officers was held Saturday evening at the high school. A banquet had been prepared to welcome the new graduates from the school into the association. Representatives were present from practically every class which has graduated from that institution.

James D. Hedge, a member of the class of 1899, acted as chairman of the evening and introduced the speakers ,including Roy W. Cloud, president of the first class, A. C. Argo, principal of the school, and John Gill, its vice-principal.

The committee which had made arrangements for the affair, consisted of the following graduates: Oscar Olsen, Kendall Towne, Miss Gladys Palmer, Louis Behrens, Frank Griffin, J. D. Hedge, Wesley Locker, Harry Arnold, Gerald Shields and Miss Bess Leggett.

The officers elected were Clifton Woodhams, president; Jack Nystrom, vice-president ;and Camilla Stafford, secreatry and treasurer.

THIS ONE DIDN'T GET AWAY

We have all heard of the fish which got away. The one that was too big for the line or that straightened out the hook. Every fishing season brings a new crop. It remained for George Eikerenkotter this year to show the proof of the big fish story.

It was a short story but a long fish that George brought into town yesterday morning to show to his friends who have smiled knowingly in the past. The fish was a steelhead and measured 19½ inches. It was hooked in the upper reaches of Tunitas creek, at a spot which George is keeping a secret. George also brought back several fine young trout to show his friends that he does not have to take sardines on his fishing trips in order to have fish to eat.

George has long held an enviable record among the shooters of ducvks, but he now ascends to the post of champion fish catcher of the community.

LOCAL DOG WINS RACES

"Mickey Moore," an imported hound from Ireland and owned by T. P. Maloney of Redwood City, winner of many stakes, chalked up another victory at the Richmond Coursing Park last Sunday when he won the open stakes, defeating Dan Patch in the finals. 'Barber B also owned by Mr. Maloney, was the runner up in other races. Mr. Maloney is the owner of several of the fleetest dogs in the state.

MOVIES

RAYMOND HATTON RIOT IN "BORN TO THE WEST"

Raymond Hatton, whose comedy team work with Wallace Beery in "Behind the Front," is still a laughing memory, furnishes many new laughs in "Born to the West," Paramount's picturization of Zane Grey's story, which comes to the Sequoia Theatre on next Wednesday Thursday, June 30 and July 1st.

This time the little comedian is teamed with Jack Holt. Hatton brave only when his pal, Jack Holt, "Colorado" Rudd, is at his elbow, seems to wiggle in and out of trouble in carefree manner all through the picture.

"Born to the West" brings Jack Holt to the screen in one of his best roles to date. Margaret Morris and Arlette Marchal, representative American and French beauties, furnish the pulchritude and drama, the former as the childhood sweetheart of Holt and Miss Marchal as a dancehall girl.

Paramount has provided a most brilliant supporting cast which includes George Siegman, Tom Kennedy, Richard Neill and Edith Yorke.

There are no dull moments and thrills abound. They include novel gun-play, a horse and rider leaping cliffs to escape pursuers and heartstopping scenes with a runaway coach.

John Waters directed the picture under the personal supervision of Hector Turnbull, Associate Producer for Paramount. Lucien Hubbard adapted the story to the screen.

BRIEF FACTS ABOUT MARY'S NEW MOVIE

Mary Pickford, foremost screen artiste, in her new screen feature, "Little Annie Rooney," a United Artists Corporation release coming next Monday and Tuesday, June 28 and 29 to the Sequoia Theatre, has stepped out of the costume drama role and back into the ragamuffin, hoydenish, comedy characterization that so endeared her to the public and won her the title "The World's Sweetheart."

The scenes of "Little Annie Rooney" for the most part are laid in the teeming lower East Side district of New York City, and the famous old Brooklyn Bridge has an important role.

Little Annie Rooney is the 12-year-old daughter of a New York policeman; leads a band of street urchins in fiercely contended, rough and tumble, biting and kicking battle with rival gangs; and is secretly and madly in love with a strapping truck driver, the pal of her big brother, Tim Rooney.

Her garb consists of cheap calicoes, much-darned stockings, down-at-the-heel shoes, and sometimes, a boy's cap.

Ten different nationalities and races are represented among the kid types in the two score or so youngsters figuring in the picture. There also are many animals — dogs and cast, a goat, a pig and a couple of horses.

Lower East Side New York streets and districts faithfully are reproduced in the picture. There are streets and areaways littered. Almost all of the picture was made at the Pickford-Fairbanks studio, Hollywood.

Redlands Editor Kiwanis Speaker

Lyman M. King, editor of the Redlands Facts and a former state senator from San Bernardino county, was the chief speaker at the Wednesday noon meeting of the Redwood City Kiwanis Club. His subject was state taxation and he gave a very comprehensive address, covering briefly the history of our present system of taxation in this state and outlining some of the things that might be done to improve it.

Senator King, who is the Republican candidate for lieutenant-governor, is the author of the King Tax Bill which was passed by the legislature in 1921 and which resulted in a saving to the people of the state of a tax raise of 22 per cent.

Bill Kelley of the high school faculty, acted as chairman of the meeting. A large delegation was present from the Burlingame-San Mateo Club in the interest of securing a good attendance from this city at the ball game which was to follow in the evening between the two clubs at San Mateo

Wedding is Planed For This Afternoon

That Cupid's darts are not excluded even from the business-like atmosphere of an electric office will be proved this afternoon when Mrs. Isabel Alvis and Harold Mitchell will be united in matrimony. Both are employees of the Pacific Gas and Electric Company's local division.

Mrs. Alvis is the daughter of Mrs. Clara Keown of this city and is very popular. She has been employed in the office of the gas company for some time and has made many friends in her contact with the public. The groom is the son of Mr. and Mrs. George Mitchell and is connected with the gas department of the company.

The wedding will be held in the parlors of the Congregational church and will be officiated at by Rev. R. J. Currie. Miss Florence Valencia will be the bridesmaid, and Stanley Mitchell, a brother of the groom will be best man. Following the ceremony, the young couple will leave for a wedding trip in the south, and upon their return will make their home in this city.

The World's Sweetheart

In the ragamuffin and hoydenish type of role that made her beloved by millions. Her curls of gold again fly free, her mischievous smile and her prankish ways fascinate and charm in a picture so human it hurts, so pleasing that it takes the hurt away.

Sequoia Theatre Monday-Tuesday June 28 and 29

SEQUOIA POOL TO BE OPENED TO PUBLIC

By DALLAS CONINE

Hay "Skinnay" come on in, the water's fine. Come in where? "There's not a swimming pool in Redwood City where a youngster can go in swimming, at least as far as I konw," say the citizens of Redwood City. But the citizens are wrong for on Sunday, June 27, the Sequoia Union High School out-door swimming pool opens for the summer.

The pool is being opened by the school to enable the people of Redwood City to come and enjoy the comforts of the school plant and not as a money making proposition. A small sum will be charged the bathers and the money will be used to defray the expenses are cleared. Last year the tank will be open as long as expenses are clearer. Last year the pool, under the control of Mr. Kelley, remained open for almost the whole summer. The pool drew quite a large attendance, but it is expected that the attendance for this year will exceed that of last season.

Frank J. Griffin will have charge of the pool this summer. Mr. Griffin is the basketball coach and physical education director of Sequoia High School. The tank will be in even better condition than that of last years and new features are being made for the swimmer's amusement.

A new ten-foot spring board is being installed this week by Mr. Taylor, school engineer, and the board will be ready for use in a few days. The sanitary conditions of the pool are excellent and the water is kept fresh by the filtering system that keeps the water circulating continually.

The admission for students will be fifteen cents and for adults twenty-five cents. Suits and towels will be furnished all bathers.

PLEADS GUILTY TO ATTACK

Albert Troester pleaded guilty to a charge of assault Tuesday before Superior Judge George H. Buck. He had previously pleaded not guilty to a statutory offense growing out of an attack of a San Francisco girl.

P.G.&E CO IS HOST

Continued from Page One

ious officials, in which the policies of the company along the lines of development and public service were explained, and it might be said here while a great many of the party could not talk in terms of 'watts and watt nots' and often did not know perhaps what it was all about, they nevertheless began to appreciate the efficiciency of this company, the never-failing distribution of power to its consumers, and the place this concern has made for itself in the social, industrial and moral life of California.

A short journey from the Claremont station took the party to the load dispatcher's office in the company's building at 17th and Clay streets in Oakland. This office is the control center for the entire generating and distributing system, and to the uninitiated resembles the operation of a train dispatcher, for this office is in constant communication with every line of the large system and it must know at all times switches that are operating, where the current is flowing and the condition of the line, much as a train dispatcher keeps in constant touch with the trains over his road. Operators are constantly on duty in this office.

The gas plant which manufactures the gas for distribution in the east bay section was next visited and much of interest explained to the men of the fourth estate who by this time were full of volts and ampheres. Here was a new phase of the company's business, and one in which perhaps the newspaper men felt more at home, at least in some degree, he knew about the distributing end of the gas business.

Emeryville was the next stop, and here the immense warehouses and laboratories of the company were shown the visitors. The plant occupies twelve and three quarters acres of land, and is a wealth of interesting operations, materials and equipment. Here one might spend weeks with interest and entertainment, as the many departments are veritable beehives of industry. In order to keep the schedule much of interest was hurried past, and the questioning newspaper man suppressed his asking the wherefores, etc.

The trip continued to San Francisco, where the party assembled at the Clift hotel for dinner, during which vocal and instrumental music was furnished.

Wiggington Creed, president of the Pacific Gas and Electric Company, made the only address of the evening, and he made clear the policy of the company in its development of power and the desire of the company to render service and play its part in the development of the great state of California. He pointed out the advantages of the inter-connecting system operated by his company in the development of the state, and the fact that California leads the world in electrical development; the elimination of the "middle man" profit, made electrical rates lower; and assures continued service.

After the dinner the party was taken to the Curran Theatre, where "Patsy" a musical comedy was the attraction.

Hotel accommodations were provided for the guests and on the following morning, Station A, the steam electric generating plant in San Francisco was inspected. This plant is an auxiliary to the hydro-electric plants, and is merely a stand-by plant in emergency to assure continued service.

The affair was a decided success, showing that much consideration had been given to the trip to insure the pleasure of the guests. All went home convinced of the 'power' behind the P. G. and E. and with the conviction that this company knows how to distribute the power as well as generate it.

Lot For Sale

FOR SALE—2 Lots, Lots 6 & 7, Blk. 5, West Redwood, being 2nd and 3rd lots from corner, Roosevelt Ave., and Sequoia St. No Agents. Deal direct with owner. Terms, cash only. Any reasonable offer considered. Address Benjamin Ziegler, 1224 St. George Street, East Liverpool, Ohio. j-12
